¹ Event month for each condition and/or case may be month of onset, or month of diagnosis, report, or other event that approximates onset. For pediatric influenza mortality and Creutzfeldt-Jakob disease, the event month is the month of death.

² The first Texas case of the 2009 novel H1 N1 influenza A strain was identified in April. Novel Influenza A is a count of the number of novel strains detected by CDC in isolates from Texas. This strain resulted in a pandemic.
