¹ DSHS Center for Health Statistics projected 2012 Texas population data <http://www.dshs.texas.gov/chs/popdat/st2012.shtm>

² Infant botulism rates are calculated using the population under 1 year of age.

³ Perinatal hepatitis B cases are defined as infants >1 month of age through 24 months of age who were born in the US to HBsAg positive mothers.

The rates were calculated using the population under 2 years of age, which approximates this cohort.

⁴ Influenza-associated pediatric mortality is calculated using the population under 18 years of age.
