¹ DSHS Center for Health Statistics projected 2014 Texas population data <http://www.dshs.state.tx.us/chs/popdat/detailX.shtml>.

² Infant botulism rates are calculated using the HSR populations under 1 year of age.

³ Perinatal hepatitis B cases are defined as infants >1 months through 24 months of age. The rates were calculated using the HSR populations under 2 years of age, which approximates this cohort.

⁴ Pediatric influenza deaths rates were calculated for the HSR populations <18 years of age.
