<sup>1</sup> DSHS Center for Health Statistics projected 2017 Texas population data <http://www.dshs.texas.gov/chs/popdat/ST2017.shtml>

<sup>2</sup> Infant botulism and congenital rubella syndrome rates are calculated using the Texas populations under 1 year of age.

<sup>3</sup> Perinatal hepatitis B cases are defined as infants >1 months through 24 months of age. However, the rate calculation for those <1 year does not exclude those <1 month of age. The rate calculation for the 1-4 year age group cell includes only the 1 year old population.

<sup>4</sup> Influenza-associated pediatric mortality rates were calculated for the Texas populations <18 years of age including those <1, 1-4, 5-9, 10-14, and for the 15-19 age group only those 15-17.
