¹ Population data is projected population accessed 4/18/18 from the Department of State Health Services, Center for Health Statistics <http://www.dshs.state.tx.us/chs/popdat/popup.shtm>.

² Infant botulism and congenital rubella syndrome rates are calculated using the HSR populations under 1 year of age.

³ Perinatal hepatitis B cases are defined as infants >1 months through 24 months of age. The rates were calculated using the HSR populations under 2 years of age, which approximates this cohort.

⁴ Influenza-associated pediatric mortality rates were calculated for the HSR populations <18 years of age.
