

Texas Influenza Surveillance Summer Report 2017–2018 Season/2018 MMWR Week 39

(September 23, 2018 – September 29, 2018)

Report produced on 10/05/2018

Summary

Influenza activity remains low across the state of Texas. It appears that influenza activity peaked in late January. Compared to the previous week, the percentage of patient visits due to influenza-like illness (ILI) and the percentage of specimens testing positive for influenza reported by public health laboratories slightly increased. The percentage of specimens testing positive for influenza reported by hospital laboratories marginally decreased. No influenza-associated pediatric deaths were reported. One influenza-associated outbreak was reported. In addition to flu, other respiratory viruses—especially rhinovirus/enterovirus—were detected in Texas during week 39.

Table 1: Summary of Texas Influenza (Flu) and Influenza-like Illness (ILI) Activity for the Current Week

Texas Surveillance Component	Change from Previous Week	Current Week	Previous Week [†]	Page of Report
Statewide influenza activity level reported to CDC (geographic spread of influenza)	Not determined during the summer	N/A	N/A	--
Statewide ILINet Activity Indicator assigned by CDC (intensity of influenza-like illness)	Not determined during the summer	N/A	N/A	--
Percentage of specimens positive for influenza by hospital laboratories	▼0.53%	1.07%	1.60%	1
Percentage of specimens positive for influenza by public health laboratories	▲0.42%	6.67%	6.25%	2
Percentage of visits due to ILI (ILINet)	▲0.25%	2.73%	2.48%	2
Number of regions reporting increased flu/ILI activity	▼4	2	6	4
Number of regions reporting decreased flu/ILI activity	No change	0	0	4
Number of variant/novel influenza infections	No cases reported	0	0	4
Number of ILI/influenza outbreaks	No change	1	1	4
Number of pediatric influenza deaths	No new cases reported	0	1	5

[†]Data displayed have been updated since last week's flu report with any new reports received.

Laboratory Results

Influenza

Hospital laboratories across Texas voluntarily report influenza tests (antigen, culture, and PCR) to the National Respiratory and Enteric Virus Surveillance System (NREVSS). Providers throughout Texas also submit specimens for influenza testing (PCR) to Texas public health laboratories, including the Texas Department of State Health Services (DSHS) state laboratory in Austin and the nine Texas Laboratory Response Network (LRN) laboratories. The results reported by Texas NREVSS participants and public health laboratories for the current week are summarized in the two tables below. Additional influenza test results (rapid tests, culture, PCR) and ILI activity were reported from providers and public health departments throughout the state (see county map at the end of this report).

Table 2: Influenza Testing Performed by Texas Hospital Laboratories for the Current Week

	Week 39	Season to Date Week Ending: September 29, 2018
Number of labs reporting flu tests	15	
Number of specimens tested	1303	164974
Number of positive specimens (%) [†]	14 (1.07%)	35339 (21.42%)
Percentage of total tests that were antigen detection tests	38.37%	
Positive specimens by type/subtype [n (%)]		
Influenza A	7 (50.00%)	23253 (65.80%)
Subtyping performed	2 (28.57%)	3355 (14.43%)
A (H1N1)	1 (50.00%)	453 (13.50%)
A (H3N2)	1 (50.00%)	2902 (86.50%)
Subtyping not performed	5 (71.43%)	19898 (85.57%)
Influenza B	7 (50.00%)	12086 (34.20%)

[†]Laboratory data in 2016-2017 and 2017-2018 season reports may not be comparable to reports from seasons previous to 2016-2017 because the data only includes hospital laboratories data for the current season.

Table 3: Influenza Testing Performed by Texas Public Health Laboratories for the Current Week

	Week 39	Season to Date Week Ending: September 29, 2018
Number of labs reporting flu tests	2	
Number of specimens tested	15	2885
Number of positive specimens (%) [†]	1 (6.67%)	1594 (55.25%)
Positive specimens by type/subtype/lineage [n (%)]		
Influenza A	1 (100.00%)	1139 (71.46%)
Subtyping performed	1 (100.00%)	1126 (98.86%)
A (H1N1)	0 (0.00%)	297 (26.38%)
A (H3N2)	1 (100.00%)	829 (73.62%)
Subtyping not performed	0 (0.00%)	13 (1.14%)
Influenza B	0 (0.00%)	451 (28.29%)
Lineage testing performed	0 (0.00%)	409 (90.69%)
B/Victoria	0 (0.00%)	39 (9.54%)
B/Yamagata	0 (0.00%)	370 (90.46%)
Lineage testing not performed	0 (0.00%)	42 (9.31%)
Other*	0 (0.00%)	4 (0.25%)

[†]Laboratory data in 2016-2017 and 2017-2018 season reports may not be comparable to reports from seasons previous to 2016-2017 because the data only includes hospital laboratories data for the current season

*Other denotes specimens with coinfections (i.e. one specimen was positive for both influenza A (H1N1) and influenza A (H3N2))

Other Respiratory Viruses

The NREVSS system collects information on a variety of respiratory viruses in addition to influenza including parainfluenza virus, respiratory syncytial virus (RSV), rhinovirus, human metapneumovirus (HMPV), seasonal coronavirus, and respiratory adenovirus. The results for the current week are summarized below.

Table 4: Non-Influenza Respiratory Virus Testing Performed by Texas NREVSS Laboratories for the Current Week

Virus	Number of Laboratories Testing	Tests Performed	Positive Tests	Percentage of Tests Positive
Adenovirus (respiratory)	9	662	22	3.32%
HMPV	10	700	4	0.57%
Parainfluenza virus	10	814	17	2.09%
Rhinovirus	9	662	221	33.38%
RSV ^{†^}	16	853	21	2.46%
Seasonal coronavirus (does not include MERS-CoV)	6	578	15	2.60%

[†]RSV tests displayed in the table are a combination of antigen detection, PCR, and culture tests. Some non-NREVSS reporters also contribute to the RSV data.

[^]Numbers and percentage may differ from the weekly RSV report. The weekly RSV report may be accessed at <https://www.dshs.state.tx.us/RSV/disease/rsv-Data.aspx>.

U.S. Outpatient Influenza-like Illness Surveillance Network (ILINet)

Table 5: Texas ILINet Reporting and Patient Visit Summary for the Current Week

	Week 39
Number of providers reporting [†]	99
Number of providers reporting patient visits	99
Number (%) of providers with at least one ILI case	77 (77.78%)
Percentage of all visits due to ILI	2.73%
Texas ILINet baseline [‡] , 2017-2018	6.41%

[†]Reporting providers include both ILINet and RVSP providers.

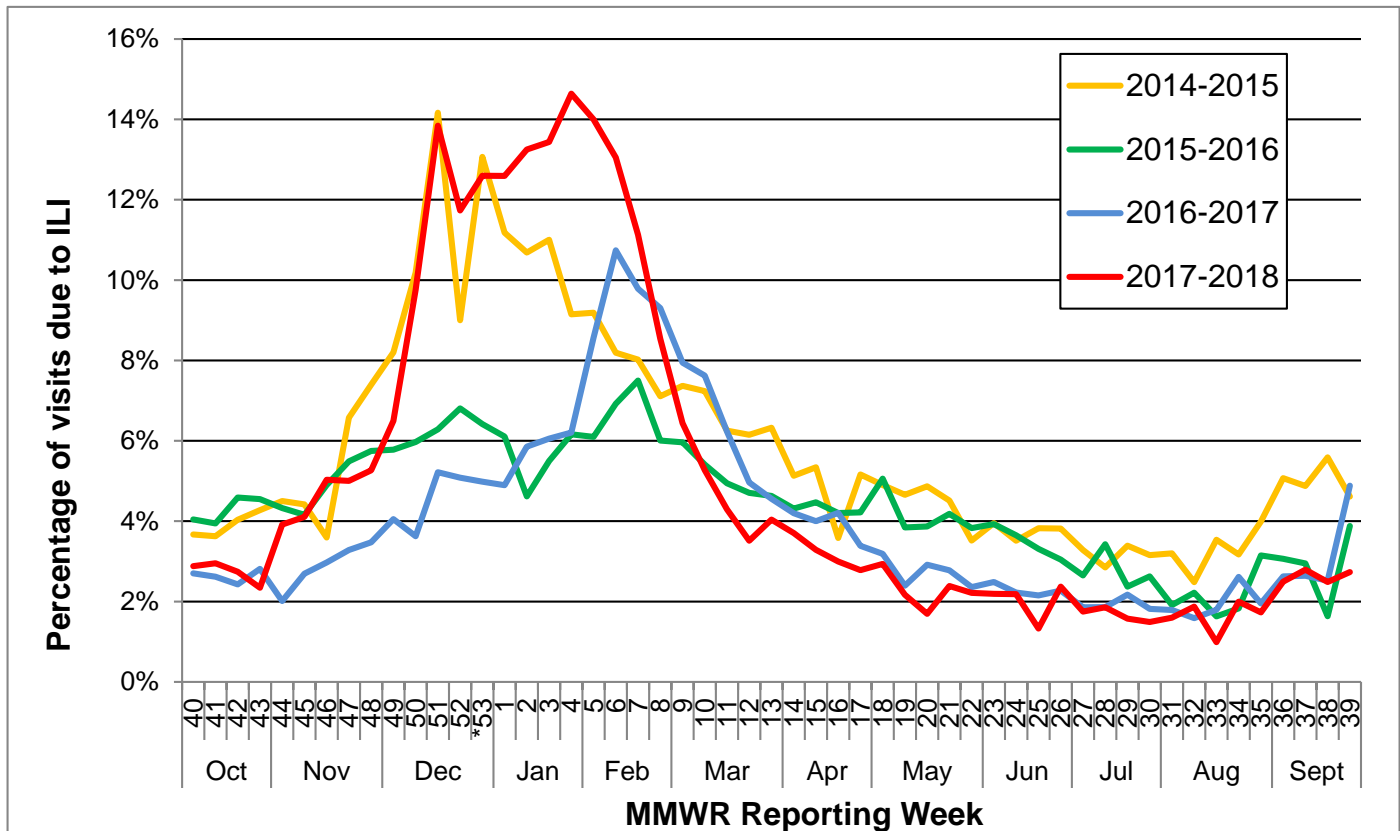

[‡]The baseline is the mean percentage of patient visits for ILI during non-influenza weeks for the previous three seasons plus two standard deviations. A "non-influenza week" is defined as a week that accounted for less than 2% of the season's total number of specimens that tested positive for influenza

Table 6: Percentage of Visits for Influenza-like Illness Reported by Texas ILINet Providers (as of 10/04/2018 11:00 AM)

Week	Providers Reporting	Number of ILI Cases by Age Group (Years)					Total ILI (all ages)	Total Patients	ILI
		0-4	5-24	25-49	50-64	65+			
201740	116	165	327	166	120	140	918	31871	2.88%
201741	118	171	286	186	130	155	928	31433	2.95%
201742	115	153	282	188	114	127	864	31527	2.74%
201743	111	188	297	138	61	26	710	30309	2.34%
201744	81	206	386	156	117	147	1012	25857	3.91%

201838	98	107	221	128	94	112	662	26646	2.48%
201839	99	111	217	209	108	103	748	27370	2.73%

Figure 1: Percentage of Visits Due to Influenza-like Illness reported by Texas ILINet Participants, 2014–2018 Seasons*

*There was a week 53 in the 2014-2015 influenza season, but there is not a week 53 for the 2017-2018 influenza season or the other previous seasons; therefore, the week 53 data point for those seasons is an average of week 52 and 1.

Reports from Health Service Regions

Reports were received from six Health Service Regions (HSRs) during week 39

Table 7: Influenza Activity Compared to week 38 by Health Service Region (HSR)

Influenza Activity Comparison	Health Service Region (HSR)
Increased	1 and 7
Same	2/3, 4/5N, 8, and 9/10
Decreased	
Unsure	

Variant Influenza Viruses

No variant or novel influenza viruses have been detected in Texas during the 2017-2018 season.

Institutional Outbreaks and School Closures

One influenza-like illness outbreak was reported during week 39 in PHR 11 at a shelter. Three residents tested positive for influenza A by rapid test.

P&I Mortality Surveillance Data

Pneumonia and influenza (P&I) death data are obtained from death certificates of Texas residents whose underlying or contributing cause(s) of death is reported as pneumonia or influenza. P&I deaths are identified based on ICD-10 multiple cause of death codes. In particular, P&I deaths are based on ICD-10 pneumonia and influenza mortality codes.

Eleven thousand nine hundred and seventeen P&I deaths have been reported in Texas during the 2017-2018 influenza season.

Table 8: Texas P&I Deaths Occurring Oct. 01, 2017- Oct. 03, 2018* by Age

Age Category (years)	Number of P&I Deaths ⁺	Mortality Rate (per 100,000)
0 - 4	54	2.56
5 - 17	25	0.46
18 - 49	703	5.41
50 - 64	2014	39.37
65 +	9121	248.45
Overall	11917	40.58

*NOTE: Data are provisional and subject to change, errors, and duplicates

⁺ If the cell count is less than 10, the number of P&I deaths is suppressed and <10 is written in the cell.

Table 9: Texas P&I Deaths Occurring Oct. 01, 2017- Oct. 03, 2018* by Health Service Region (HSR)

HSR	Number of P&I Deaths	Mortality Rate (per 100,000)
1	462	50.19
2/3	3452	40.64
4/5N	900	55.49
6/5S	2757	35.92
7	1401	39.12
8	1342	44.23
9/10	623	39.53
11	978	39.68
Unknown	<10	N/A
Overall	11917	40.58

*NOTE: Data are provisional and subject to change, errors, and duplicates

Influenza-Associated Pediatric Mortality

No influenza-associated pediatric deaths were reported in week 39.

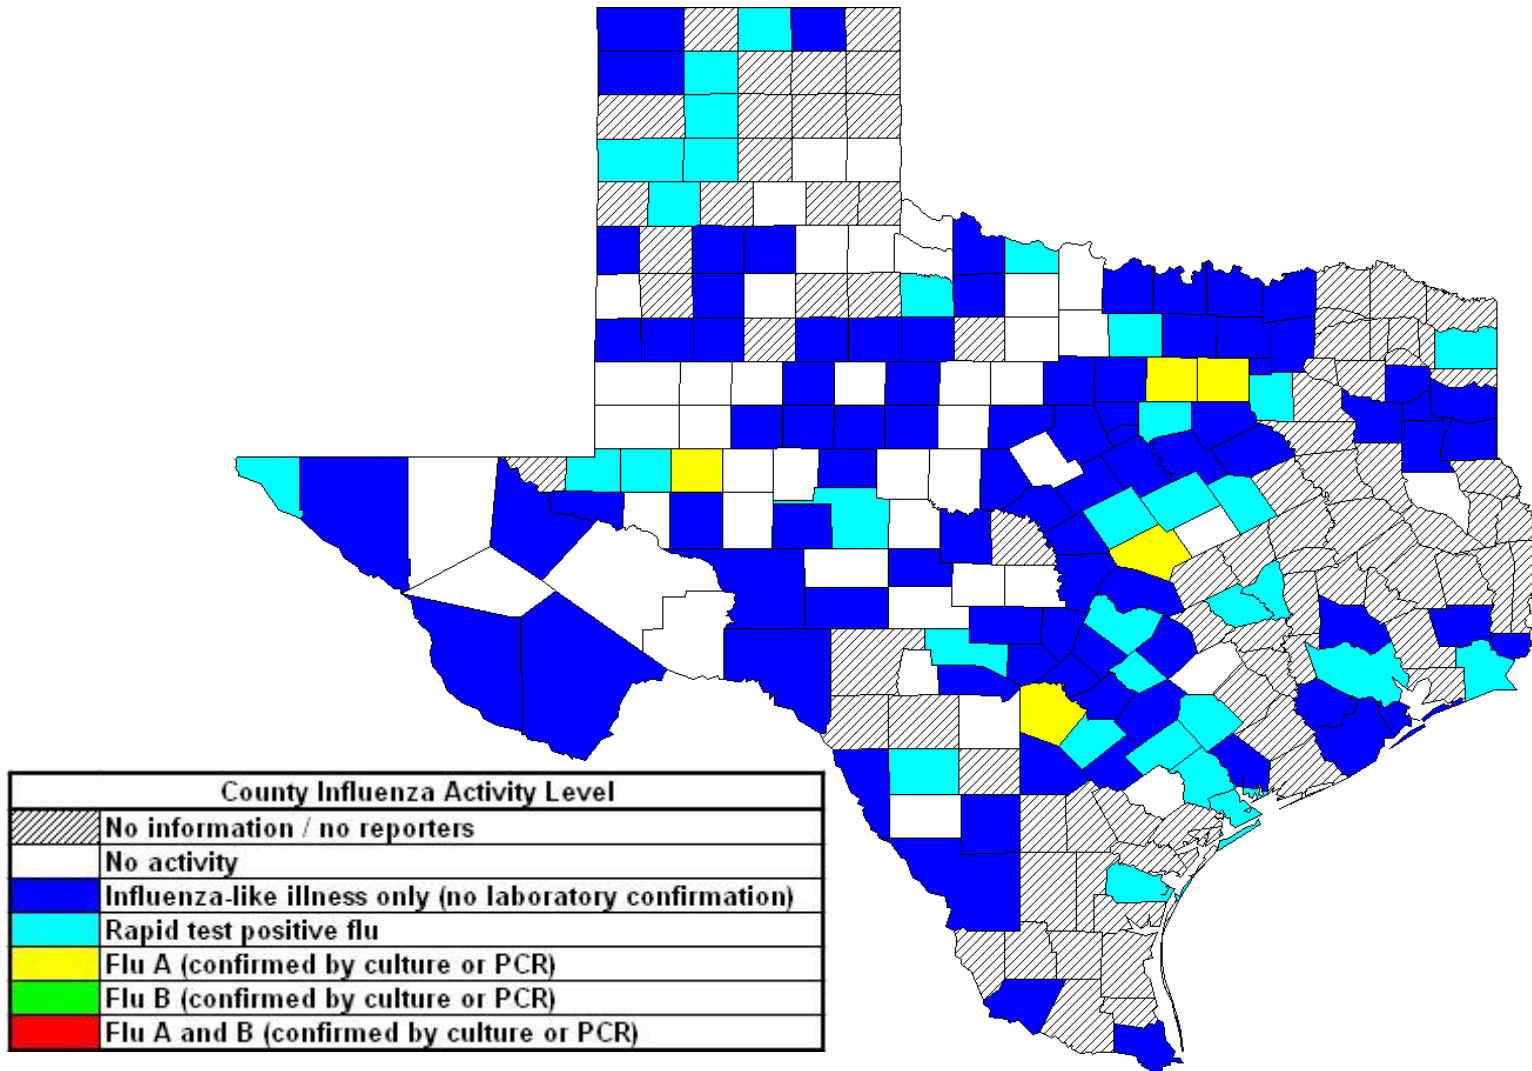

Seventeen influenza-associated pediatric death has been reported in Texas during the 2017-2018 influenza season. Cases of influenza-associated pediatric mortality (children <18 years of age) are reportable year-round and by law in Texas

Table 10: Influenza-Associated Pediatric Deaths Reported in Texas during the 2017–2018 Season

Month of Pediatric Death	Influenza A (H1N1)	Influenza A (H3N2)	Influenza A (Not Subtyped)	Influenza B	Influenza, Not Typed / Not Differentiated	Influenza virus co-infection: A (not subtyped) and B	Total, All Influenza Types / Subtypes
2017							
October	0	0	0	0	0	0	0
November	0	1	1	0	0	0	2
December	1	1	1	0	0	0	3
2018							
January	0	1	0	0	0	0	1
February	0	1	0	5	1	0	7
March	1	1	0	1	0	0	3
April	0	0	0	0	0	0	0
May	0	0	0	0	0	0	0
June	0	0	0	0	0	0	0
July	0	0	0	0	0	0	0
August	0	0	0	0	0	0	0
September	0	0	0	1	0	0	1
Total	2	5	2	7	1	0	17

Statewide Influenza Activity Map

Figure 2: Texas Map Displaying the Highest Level of Influenza or ILI Activity Reported by County for the Week Ending Sept. 29, 2018 (MMWR Week 39)

Please note: The majority of influenza cases are not reportable by law in Texas. This map contains data from sentinel sites and only displays influenza and ILI cases that were reported to public health. Positive laboratory results are reported according to specimen collection date, or date received in the laboratory if the former is unknown.

Texas Influenza Surveillance Components and Measures

Activity codes (see <http://www.cdc.gov/flu/weekly/overview.htm>)

Statewide influenza activity level

A code reported weekly by states and territories to CDC indicating the geographic spread of influenza in the state. Levels are no activity, sporadic, local, regional, and widespread.

ILINet Activity Indicator

A statewide level of influenza-like illness intensity (on a scale of 1-10, with 1 being the lowest level) assigned to each state weekly by CDC based on data reported through ILINet.

Morbidity

Novel/variant influenza

Thorough investigations are performed on all cases of novel/variant influenza. *This condition is reportable by law in Texas.*

Texas ILINet

Providers voluntarily report weekly to CDC's ILINet system on the number of outpatient visits for ILI and total outpatient visits. Providers may submit up to 5 specimens per month for influenza testing. See <http://www.dshs.state.tx.us/idcu/disease/influenza/surveillance/ILINet/> for information on how to become an ILINet provider.

ILI activity

Non-ILINet providers report ILI or influenza data weekly to local or regional health departments.

Outbreaks

Healthcare, schools, childcare, and correctional facilities report ILI and influenza outbreaks to health departments in Texas. *This condition is reportable by law in Texas.*

Mortality

Pneumonia and Influenza (P&I) Mortality Surveillance

The DSHS Vital Statistics Unit collects death certificate information for all deaths on Texas residents from various partners such as funeral homes and local registrars around the state. The death certificates are then sent to the National Center for Health Statistics (NCHS) where the cause of death and underlying causes of death on the death certificates are coded with ICD-10 mortality codes. Once death certificates are coded, the information is sent back to DSHS Center for Health Statistics (CHS). CHS produces a Weekly Pneumonia and Influenza (P&I) Death Report and sends it to the State Influenza Surveillance Coordinator for inclusion in the Texas Weekly Flu Report. P&I deaths are identified based on ICD-10 multiple cause of death codes, and in particular, pneumonia and influenza mortality codes. Delays inherent in death reporting and coding practices may cause the number of reported P&I deaths to vary considerably each week.

Influenza-associated pediatric deaths

Deaths that are associated with influenza in children < 18 years of age are reported to health departments in Texas. *This condition is reportable by law in Texas.* <http://www.dshs.state.tx.us/idcu/disease/IAPM/>

Laboratory

DSHS Austin laboratory

Providers voluntarily submit specimens to the DSHS Austin laboratory for influenza PCR testing throughout the season. Providers sign up for this program through their local health departments.

Laboratory Response Network (LRN) laboratories

Providers voluntarily submit specimens to one of the 9 Texas LRNs for influenza PCR testing throughout the season. Providers sign up for this program through their local health departments.

NREVSS

Laboratories voluntarily report influenza and other respiratory virus data weekly through the CDC's online NREVSS reporting system. **Laboratories sign up for this program by contacting DSHS.** <http://www.cdc.gov/surveillance/nrevss/>
