

TEXAS Health and Human Services

Governor's EMS and Trauma Advisory Council

Friday, August 23, 2024 8: 00 AM (CDT)

Alan Tyroch, MD, FACS, FCCM, Chair Ryan Matthews, LP, Vice Chair

1. Call to Order

2024 Governor's EMS and Trauma Advisory Council Meeting 3rd Quarter

This meeting is being conducted live and virtually through Microsoft Teams.

Public participation is available at: DoubleTree by Hilton Austin, Phoenix Central Ballroom 6505 N Interstate 35 Austin, TX 78752

Virtual Rules of Participation

Rules of Participation

- Please be respectful during the meeting to ensure all members can be heard.
- Please do not monopolize the time with your comments.
- Please limit comments to three minutes or less.
- Please allow others to voice their opinion without criticism.
- Everyone's voice and opinion matters.

Please understand that the meetings are live on TEAMS and recorded.

Rules of Participation

- If you would like to make a statement or ask a question, please put your question in the chat with your name and entity you represent. *Please note: Anonymous entries in the chat are unable to be shared.*
- Please do not put your phone on hold at any time if you are using your phone for audio.

| To mute/unmute if not using the computer for audio, press | | |
|---|----------------|--|
| *6 on Android phones | *6# on iPhones | |

Rules of Participation

- **Council:** Please have your camera on during today's meeting. When speaking or making a motion, please state your name for the meeting record.
- **Committee members:** Please have your camera on and state your name when speaking.
- All online participants: Please sign into the chat with your name and entity you represent and *mute your microphone* unless speaking.

2. Roll Call

Council Members attending virtually: Please have your camera on during today's meeting. **Council Members in the room:** Please remember to speak directly into the microphone so that online participants can hear your comments.

3. Governor's EMS and Trauma Advisory Council Vision and Mission

Vision:

A unified, comprehensive, and effective Emergency Healthcare System.

Mission:

Texas Department of State Health Services *To promote, develop, and advance an accountable, patient-centered Trauma and Emergency Healthcare System.*

Moment of Silence

Let's take a moment of silence for those who have died or suffered since we last met.

4. Approval of Minutes

Review and Approval of Minutes

EMS Licensing Processing Time Third Quarter FY 24 (Mar, Apr, May)

Overall – All Applications

- **EMS Personnel:** DSHS processed 7,031 applications; the median processing time of 14 days.
- **EMS Educators:** DSHS processed 518 applications; the median processing time of 116 days.
- **EMS Providers:** DSHS processed 74 applications; the median processing time of 71 days.
- First responder organizations: DSHS processed 66 applications; the median processing time of 69 days.

What Delays Application Processing (ECA, EMT, AEMT & Paramedic)

- Initial applicants applying **early** and **not** having your NREMT information on your application or applying too **early** before completing the fingerprint background check.
- Apply when you have your NREMT certification and about two days before your background check fingerprint appointment.
- Generally, this allows DSHS to work your application once and grant your certification/license faster.
- Watch your email for deficiency notices. Check your spam/junk folders. Failure to respond to a deficiency email causes delays for most renewal applications.
- List @dshs.texas.gov in your safe sender list.

First Responder Organization Certificate New Look

Texas Department of State Health Services

EMS FIRST RESPONDER ORGANIZATION

This certifies that the First Responder Organization listed below has submitted acceptable evidence of compliance with the Texas EMS Rule 25 TAC 157.14 and is hereby granted approval as an EMS First Responder Organization by the State of Texas. A first responder organization approval is non-transferable. This document is valid only for the organization listed below. This certificate should be displayed at the organization's headquarters. A copy of this document may be carried in each first responder vehicle as proof of registration.

> Approval Number: Authorized Level: Advance Life Support Expiration Date: August 31, 2026 Issue Date: August 12, 2024

If you have a complaint about the services you have received from this First Responder Organization of it you have a reason to believe that a violation of Texas EMS Regulations has occurred, please report your concerns to the Texas Department of State Health Services at: 1-800-452-6086 or by email to EMS_Complaint@dshs.texas.gov.

Jia Benno, MPH Office of Injury Prevention Manager

Emergency Medical Services and Trauma Registries (EMSTR) Emergency Medical Services (EMS) Stroke and Cardiac Data

August 23, 2024

Jia Benno, MPH Texas Department of State Health Services (DSHS) Injury Prevention Unit Director

About EMSTR

- EMSTR collects reportable event data from EMS providers, hospitals, justices of the peace, medical examiners and rehabilitation facilities.
- EMS providers and trauma facilities must report all runs and trauma events to EMSTR under Texas Administrative Code, Title 25, Chapter 103.

NOTE – An EMS run is a resulting action from a call for assistance where an EMS provider is dispatched to, responds to, provides care to, or transports a person.

Per epidemiology best practice, EMSTR suppressed data with less than five records to protect identifiable information; noted with an asterisk (*).

Presentation includes data from 2019-2022. Staff prepared data analyses based on "closed" EMS datasets.

EMSTR Current Status

| EMS 2022 Unique Records | EMS 2023 Records* | EMS 2024 Records* |
|-------------------------|-------------------|-------------------|
| 4,603,934 | 4,887,247 | 2,429,971 |

| Trauma 2022 Unique Records | Trauma 2023 Records* | Trauma 2024 Records* |
|-------------------------------|----------------------|----------------------|
| 162,409 | 236,890 | 68,536 |

*Record count as of 8/14/2024. NOTE – record counts are not final as these datasets are not closed yet. There may be some duplicate 2023 and 2024 records until the dataset is final and cleaned.

Stroke Data Request 2019-2022

Inclusion Criteria – All Suspected Strokes

- Primary symptom, other associated symptom, provider's primary impression or provider's secondary impression variables included International Classification of Diseases Tenth Revision (ICD-10) codes:
 - G45 Transient cerebral ischemic attacks and related syndromes;
 - G46 Vascular syndromes of brain in cerebrovascular diseases;
 - 160 Nontraumatic subarachnoid hemorrhage;
 - I61 Nontraumatic intracerebral hemorrhage; and
 - 163 Cerebral infarction.
- Protocols used were "Medical Stroke/TIA"**.
- Stroke Scale Result was "Positive".

Inclusion Criteria and Definitions - Cardiac

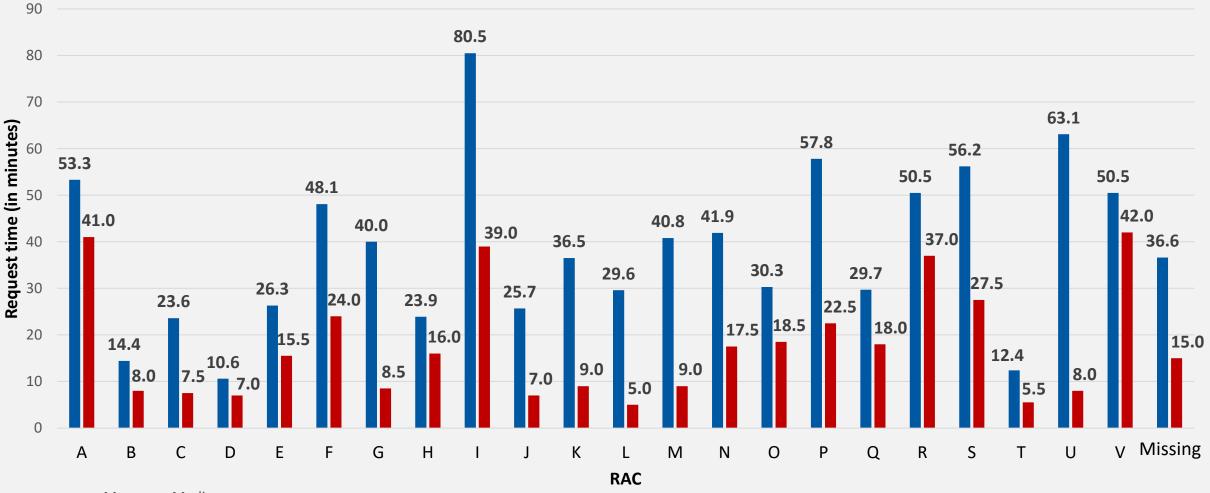

- Patients within Texas EMS dataset:
 - Incident location of hospital emergency department (ED), hallway or inpatient.
 - Destination type hospital ED or hospital non-ED bed.
- Cardiac patients Protocols used were any cardiac arrest or cardiacrelated events.
- Request time Time recorded between Public Safety Answering Point (PSAP) and unit arrival on scene.
- Response time Time recorded between unit notified of dispatch and unit arrival on scene time.

Texas Transfer Request and Response Times

| All Patients | Total Number | Mean | Median |
|---------------|--------------|--------------|------------|
| Request Time | 382,120 | 80.6 minutes | 36 minutes |
| Response Time | 382,120 | 28.0 minutes | 21 minutes |

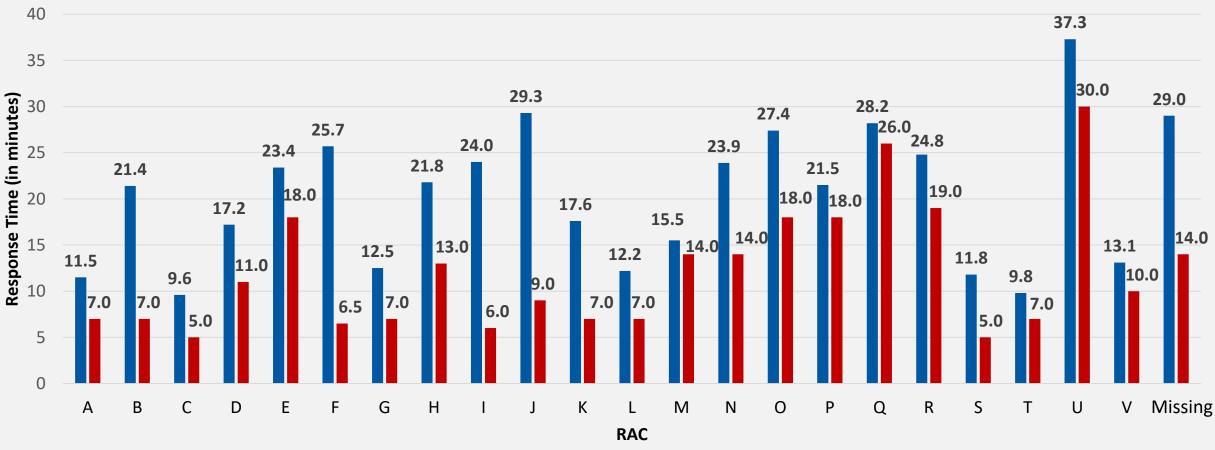

| Cardiac Patients | Total Number | Mean | Median |
|------------------|--------------|--------------|------------|
| Request Time | 6,262 | 41.3 minutes | 19 minutes |
| Response Time | 6,262 | 22.8 minutes | 16 minutes |

7. GETAC Committee Reports

7.a. GETAC Air Medical & Specialty Care Transport Committee

Chair: Lynn K. Lail, BSN, RN, CFRN, LP Vice-Chair: Cherish Brodbeck, RN, LP

AMSCT Committee

2024 Committee Priorities Update

| Committee Priorities | Current Activities | Status |
|---|--|--|
| 1. Performance Improvement : Pediatric Airway Management by Air Medical & Specialty Care Providers | With the support & monetary sponsorship of TAAMS, the GETAC AMSCTC will perform a 2-year retrospective and real- time (quarterly) Ground Air Medical qUality Transport (GAMUT) data analysis of Air Medical & Specialty Care Pediatric RSI success without hypoxia, and first pass intubation success rate, in Texas throughout 2024, with the intent of comparing Texas providers to peer performance in other states. | *DSHS mtg *TAAMS sponsorship *GAMUT Agreement *Identifying GAMUT agencies *MedServe for Non- GAMUT *Invitations |
| 2. Coordinated Clinical Care: Texas Department of Public Safety – State Troopers | The GETAC AMSCTC will develop an educational program, designed specifically for DPS Troopers, outlining the criteria for requesting an air medical asset and how to achieve that goal. | *Course outline complete *Trooper approval of course content/outline *Helo activation criteria development |

AMSCT Committee

2024 Committee Priorities Update

| Committee Priorities | Current Activities | Status |
|--|---|---|
| 3. Prevention: <i>HEMS Specific Mental Health Awareness</i> | In an effort to increase mental preparedness and wellness among Air Medical & Specialty Care Transport Providers in Texas, the GETAC AMSCTC will work collaboratively with an EMS focused mental health professional/organization (TBD) and the Regional Advisory Committee Chairs, to provide a HEMS focused mental health awareness program to AMSCT providers, in all EMT-F regions in the state, over the next 2 years. | *Brainstorming *Mental health professional engagement *Resource discovery *Shift gears? |
| | | |
| | | |

Air Medical & SCT Committee 2023 Committee Priority Outcomes

| Committee Priorities | Current Activities | Status |
|--|--|---|
| Emergency Preparedness & Response | Collaboration with EMT-F & COGs – State Interoperability Plan review | |
| Safe & Effective Statewide Ground to Air Communication | Collaboration with FD & Law Enforcement – channel access Create frequency resource document reflecting current regional channels in use *Will remain a living document, intended to have routine review *Intended as a resource document *Education & distribution via RAC Chairs – November 2024 *Resource on GETAC website | Pending GETAC Council Approval & RAC Chair Education |
| Finalize/Materialize the Air Medical Strike Team (MIST) Concept & Process | *presentation to GETAC Council Aug 2024 Continued collaboration with EMT-F leadership, resource document to be presented and utilized within EMT-F structure | |

Air Medical & SCT Committee 2023 Committee Priority Outcomes

| Committee Priorities | Current Activities | Status |
|--|---|--------|
| <u>Prevention</u> Statewide Educational Campaign to Mitigate Risks for Air Medical Transport | LZ Presentation revisions complete LZ presentation was approved by AMOA Loading videos - complete *Roll out to RAC Chairs – August 22, 2024 Approved by GETAC Council in Q3 meetings (June) | |
| System Integration Real-Time Status Reporting, by all Air Medical Providers, in all 22 Regions of the State | Collaboration with Juvare to ensure all TX air providers' CAD systems are "talking" to the nationwide system being created Approximately 90% of air agencies are participating | |
| | RAC Chairs educated & system live on 8/22/2024 | |

7.b. GETAC Cardiac Care Committee

Chair: James J. McCarthy MD Vice-Chair: Craig Cooley, MD

Cardiac Care Committee

2024 Committee Priorities Update

| Committee Priorities | Current Activities | Status |
|--|---|----------------|
| Partner with DSHS to identify cardiac data elements currently available in the National Emergency Medical Service Information System (NEMSIS) | Reviewed dataset from DSHS on "emergent" cardiac patient transfers. Good start, but will need to look at definitions more closely for true time dependent patients. | Data review |
| Out of Hospital Cardiac Arrest – AED access/bystander CPR - assessment | Partnering with DSHS on areas of low AED use and CPR delays – now pending GETAC PI decision on in will be included as a topic to explore for for CCC to continue to work on. In progress Made the final GETAC PI list and process is moving forward | In progress |
| Telecommunicator CPR (Coordinated clinical Care/EMS). | Brief update that information has been obtained – will be reviewed at November meeting. | In progress |
| Dwell time in transferring facilities for | Partnering with DSHS to evaluate opportunities to | In progress |

Action Item Request and Purpose

• No requests at this time.

7.c. GETAC Disaster Preparedness and Response Committee

Chair: Eric Epley, NREMT-P, CEM Vice-Chair: Wanda Helgesen, RN

Disaster Committee Summary

- Reviewed Air Medical Committee Interoperability Document
- EMTF updates, including Hurricane Beryl
- Prehospital Whole Blood Task Force report
- EMS Wall Times at Hurricane Beryl, briefed EMS Committee for possible need for a "Wall Times Task Force"

7.d. GETAC Emergency Medical Services (EMS) Committee

Chair: Kevin Deramus, LP Vice-Chair: James Campbell, NREMT-P

EMS Committee 2024 Committee Priorities

| Strategic Plan Pillar & Objective | Corresponding Strategic Plan Pillar Strategy |
|--|--|
| Coordinated Clinical Care (Objective 5 & 8.0) Effects of EMS Wall Times on system performance and patient throughputs. | 3. Define data elements necessary to evaluate emergency healthcare system effectiveness. 4. Promote prevention education and timely access to definitive care and rehabilitation services |
| 2. Coordinate Clinical Care (Obj #6) Discuss and provide guidance on the effects SB8 funding on EMS Vacancies in Texas. Specifically paramedic vacancies. | 3. Define data elements necessary to evaluate necessary to evaluate healthcare system effectiveness |
| 3. Pillar -Performance Improvement Obj- 1.0 Focus on reducing the use of Red Lights and Sirens (RLS) statewide. Using the approved Committee white paper as a guiding document. | 2. Utilize evidence-based best practices to improve outcomes for patients, as well as healthcare providers, and promote the Culture of Safety across all entities of the system. |

EMS Committee

2023 Committee Priority Outcomes

Priority Not Implemented Priority Activities Recorded

Priority Completed and Monitored

| Committee Priorities | Outcomes | Status |
|--|---|--------|
| Hall time / Wall time white paper | COMPLETED | |
| Safety / Security EMS Personnel | Work in Progress: Discussion on personal safety on volatile scenes. Previously, the Committee's White Paper on the use of RLS | |
| Discussion and preparation for the next active shooter / MCI | Presentation regarding recent Texas incidents and provided a "lessons learned" opportunity. Working with private for-profit technology vendors to improve system response (Pulsara) demonstrations and implementation. | |

EMS Committee

2024 Recommended Performance Improvement Initiatives

| Committee PI Initiatives | Recommended Performance Measure | Accepted |
|---|---|----------|
| Reduction of RLS (Red Lights & Sirens) usage during EMS responses to 911 calls and transportation of patients to definitive care. | Reduce the use of RLS by 50% for nonpriority 1 responses. Using existing EMD priority determinants to identify universal priority response. Reduce the transport of patients while using RLS by 80% for nonpriority 1 patients. | |
| Reduction of EMS Wall Times in Texas and analyze the impact of the associated white papers on the issue. | Reduce the EMS quantity of "Wall time incidents" by measuring acceptable defined "Patient hand off times" by 80%. | |

GETAC Committee/Stakeholder Action Item Request for Council August 2024

Kevin Deramus, LP EMS Committee

Action Item Request and Purpose

- Please provide a **single**, clear and concise statement defining your action item request:
 - Formation of a Task Force to analyze the impact of EMS Wall Time data across Texas

- In **one** clear and concise statement, please explain the purpose for this request:
 - The Task Force in collaboration with the RAC's, Medical Directors, and other identified stakeholders, will collect comparative data across all regions of Texas to identify any impacts and work to identify, uses existing, or share novel approaches to reduce the impact on EMS Wall Times across Texas.

Benefit and Timeline

- What is the intended impact or benefit resulting from this request? Please provide a clear and concise response in a single statement.
 - To meet the goals that were identified in the recently GETAC approved and released EMS Wall Times White paper.

- Please provide the timeline or relevant deadlines for this request.
 - 2024-2025

7.e. GETAC EMS Education Committee

Chair: Macara Trusty, LP Vice-Chair: Christopher Nations, LP

7.f. GETAC EMS Medical Directors Committee

Chair: Christopher Winckler, MD Vice-Chair: Elizabeth Fagan, MD

7.g. GETAC Injury Prevention & Public Education Committee

Chair: Mary Ann Contreras, RN Vice-Chair: Courtney Edwards, DNP

IPPE Committee

8/2024 Committee Priorities Update

| Committee Priorities | Current Activities | Status |
|--|---|--------|
| 1. Identify data-driven opportunities to reduce the burden of fall injury and death | Data analysis pending | |
| 2. Compose the Spectrum of Prevention/best practice paper for secure firearm storage utilizing effective methodologies including applicable resources and evidence informed strategies | Document completed. To submit to Council for review and approval for vote in November's GETAC meeting | |
| 3.Compose the Spectrum of Prevention /best practice paper for prevention strategies to reduce suicide and increase individual's capacity for a safe and healthy lifestyle. | Next workday for final revisions | |

IPPE Committee

8/2024 Committee Priorities Update

Action Item Request and Purpose

- Please provide a **single**, clear and concise statement defining your action item request:
 - Requesting Council to review *Spectrum of Prevention Safe Firearm Storage* document for approval and or revisions in November's GETAC meeting.

7.h. GETAC Pediatric Committee

Chair: Christi Thornhill, DNP Vice-Chair: Belinda Waters, RN

Pediatric Committee 2024 Committee Priorities

| Strategic Plan Pillar & Objective | Corresponding Strategic Plan Pillar Strategy |
|---|--|
| 1. Coordinated Clinical Care: Develop and implement Pediatric Readiness and Simulation throughout the state by the end of the year as reported by the regional PECC's/RAC's. | Workgroup has developed 4 pediatric simulation scenarios Workgroup currently developing an additional 10 simulation scenarios Regional PECC's have been trained and will complete simulation training with at least 2 facilities within their RAC by April 2024 |
| 2. Performance Improvement: Identify 2-3 measurable pediatric performance improvement Texas PI initiatives. | Pediatric Readiness participation by Texas Hospitals and EMS Agencies as per the 2024 revised trauma rules in accordance with designation. Trauma Center compliance with quarterly pediatric simulations as per the 2024 revised trauma rules in accordance with designation. EMS Agency compliance in utilizing pediatric equipment in skills training/competency. |

Pediatric Committee

2024 Committee Priorities Update

| Committee Priorities | Current Activities | Status |
|---|--|--------|
| 1. Coordinated Clinical Care: <i>Pediatric</i> <i>Readiness and Simulation</i> | Workgroup has developed 7 pediatric simulation scenarios Workgroup currently developing an additional 8 simulation scenarios Regional PECC's have been trained and will complete simulation training with at least 2 facilities within their RAC by April 2024 | |
| 2. Performance Improvement: Identify 2-3 measurable pediatric performance improvement Texas PI initiatives. | Pediatric Readiness participation by Texas Hospitals and EMS Agencies-EMSC is meeting with RAC's Trauma Center compliance with quarterly pediatric simulations-EMSC is meeting with RAC's EMS Agency compliance in utilizing pediatric equipment in skills training/competency | |

Pediatric Committee

2024 Committee Priority Outcomes

| Committee Priorities | Outcomes | Status |
|---|--|--------|
| Research Sudden Cardiac Arrests/Deaths (SCA/SCD) in pediatrics and ECG opt-out vs opt-in for sports physicals | Tabitha Selvester and started research and will be leading this workgroup. Requests for interested parties to join the workgroup. | |
| Pediatric Committee continues to work with the Stroke Committee to develop pediatric stroke guidelines. | Reviewing children's hospitals pediatric stroke protocols and reviewing evidence based practice guidelines. Development of a pediatric stroke guideline | |
| Pediatric Committee continues to collaborate for 2 workgroups (pediatric concussion/head injury and magnet/battery ingestion). | Development of pediatric concussion/head injury toolkit Development of pediatric magnet/battery ingestion toolkit. | |

GETAC Pediatric Committee/Stakeholder Action Item Request for Council August 2024

Chair:Christi Thornhill, DNP, APRN, ENP, ACNP-BC, CPNP-AC, CP-SANE Vice Chair: Belinda Waters, RN

Pediatric Committee

Texas Department of State Health Services

Action Item Request and Purpose

- Please provide a **single**, clear and concise statement defining your action item request:
 - Request the 4 simulations approved by the Pediatric Committee be approved by the GETAC Executive Committee
 - Requests that the simulation cases are posted to the DSHS website following final formatting.
 - Request that the Head Injury/Concussion Toolkit approved by the Pediatric Committee be added to the November GETAC Council Committee Agenda for approval.
- In **one** clear and concise statement, please explain the purpose for this request:
 - To move forward with publication of pediatric simulation cases
 - To move forward with publication and dissemination of the Head Injury/Concussion Toolkit

Benefit and Timeline

- What is the intended impact or benefit resulting from this request? Please provide a clear and concise response in a single statement.
 - Improving pediatric outcomes through the utilization of pediatric simulation in designated trauma centers in Texas.
 - Creating an educational and resource toolkit for parents, schools, and athletic programs regarding head injuries and concussions.
- Please provide the timeline or relevant deadlines for this request.
 - August 2024
 - November 2024

Texas Pediatric Readiness Improvement Project Update GETAC August 2024

Texas Pediatric Readiness Project

Project Arms:

- Pediatric virtual education series
- 12 standardized pediatric trauma simulations
- Regional pediatric emergency care champions within each of 22 trauma service regions
- Pediatric QI performance measures and dashboards to drive pediatric QI efforts

Supported by:

- Governor's EMS and Trauma Advisory Council
- Texas EMS for Children
- Texas Emergency Nurses Association
- Texas Trauma Coordinators Forum
- Texas EMS and Trauma Acute Care Foundation
- National Pediatric Readiness Quality Initiative

Find My Regional PECC

https://txena.org/wpcontent/uploads/2024/08/Texas-R-PECC-Directory-rev-8.15.24.pdf

- <u>Regional Pediatric Emergency Care Coordinators</u>
 > 31 R-PECCs in 22 RACs
- Hospitals across the State with significant contacts
 ▶ 232 in 22 RACs. All have agreed they are open to Pediatric Readiness.
- Simulations conducted in Emergency Departments
 ➤ 105 sims in 15 RACs (not all RACs have conducted sims)
- Number of staff participants in simulation scenarios participated in simulation
 - >1,056 people in 14* RACs since early February.
 - * One RAC missing the number of participants

ED Pediatric Readiness Improvement Education Series

- 1-hour virtual sessions held 3rd Thursday every month @7am
- Pediatric-specific topics
- Highlight evidence-based practices and resources for adoption
 - Applicable simulation exercises offered
 - Emphasis on evaluating ED performance using NPRQI platform

- January 18
- February 15
- March 21
- April 18
- May 16
- June 20
- July 18
- August 15
- September 19
- October 17
- November 21
- December 19
- January 16, 2025
- February 20, 2025

Data from sessions 1-8

Education Series Stats

| Session | Торіс | Registrants | Webinar Attendees (unique viewers) | CE Awarded |
|-----------|--|-------------|---|------------|
| Session 1 | Overview of the Texas Pediatric Readiness Improvement Initiative | 404 | 227 | 193 |
| Session 2 | ESI/Pediatric Assessment and Triage | 993 | 351 | 245 |
| Session 3 | Respiratory Distress | 1238 | 312 | 221 |
| Session 4 | Traumatic Brain Injury | 1341 | 312 | 173 |
| Session 5 | Non-Accidental Trauma (Child Maltreatment) | 1404 | 259 | 181 |
| Session 6 | Long-bone Fractures and Pain Management | 1468 | 270 | 187 |
| Session 7 | Pediatric Ingestions | 1488 | 236 | 183 |
| Session 8 | Shock Recognition and Management | 1528 | 240 | 126 |

EMS Pediatric Readiness Education Series

 1-hour virtual sessions held 1st Wednesday every month @ 4pm

•June, 133 people registered, 32 attended, and 19 completed the CE evaluation.

•August session, 235 registered, 44 attended, and 32 completed the CE evaluation.

Texas Prehospital Pediatric Readiness Education Series

The Texas Prehospital Pediatric Readiness Education Series was created to equip prehospital providers with the necessary knowledge to provide optimal care for children during emergencies, thereby decreasing rates of morbidity and mortality.

Beginning in June 2024, 1-hour virtual sessions will highlight evidence- based or best practice guidelines and resources for adoption in EMS agencies and integrate quality improvement efforts.

View the recorded webinars below. The recordings will be posted within a few days of the live webinar. In order to earn the EMS CE, you will need to watch the entire recording and submit the completed assessment and evaluation.

Texas Prehospital Pediatric Readiness Education Series

The Texas Prehospital Pediatric Readiness Education Series was created to equip prehospital providers with the necessary knowledge to provide optimal care for children during emergencies, thereby decreasing rates of morbidity and mortality.

Beginning in June 2024, 1-hour virtual sessions will highlight evidence-based or best practice guidelines and resources for adoption in EMS agencies and integrate quality improvement efforts.

Here's a snapshot of topics slated for the monthly series:

- Pediatric Triage Tools
- Multi-System Trauma
- · Airway and Respiratory Management
- Non-Accidental Trauma

Continuing Education Credit will be available for Texas certified EMS personnel through the Texas EMS for Children Program. Texas DSHS approved CE program: License Number (600929).

When: 1st Wednesday of every month (except for holidays)

Time: 4 pm – 5pm

- July 10: Pediatric Triage Tools
- August 7: Respiratory Management
- September 4: Airway Management
- October 2: Multi-System Trauma
- November 6: OCHA Management
- December 4: TBD

Clarification on Chart Requirement for NPRQI

NPRQI Data Collection Targets

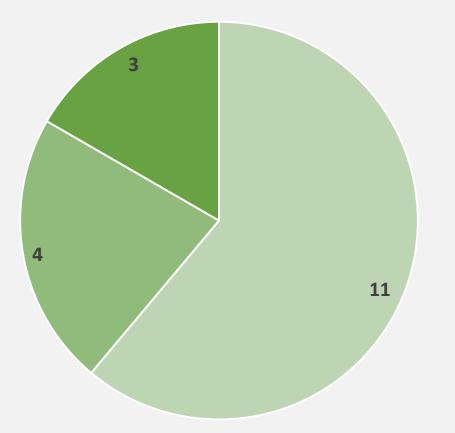

| Initial Data Entry | To ensure confidentiality of the first set of patient encounters entered into the platform, a minimum of 10 patient charts must be submitted before performance will be displayed on dashboards. |
|---------------------------------------|--|
| Baseline Performance Data Entry | For a realistic view of the ED's baseline performance, a minimum of 30 patient encounters should be entered in the platform. This allows for 3 data points that reflect baseline performance. These may be entered over a few days, weeks, months, or quarter depending on patient volume and the ED team's bandwidth. |
| Ongoing Data Entry | To maximize the benefits of the NPRQI platform, patient charts should be entered at regular intervals, based on the ED team's bandwidth and patient volume. Each ED has sole discretion when deciding which patients should be selected for data entry and which metrics should be targeted for improvement efforts. It is recommended that ED's consider pulling every 5th, 10th, 20 th or other scheduled frequency for patient chart selection. |

Note: NPRQI offers office hours to participating EDs regarding data sampling strategies, getting started with data entry, and data interpretation.

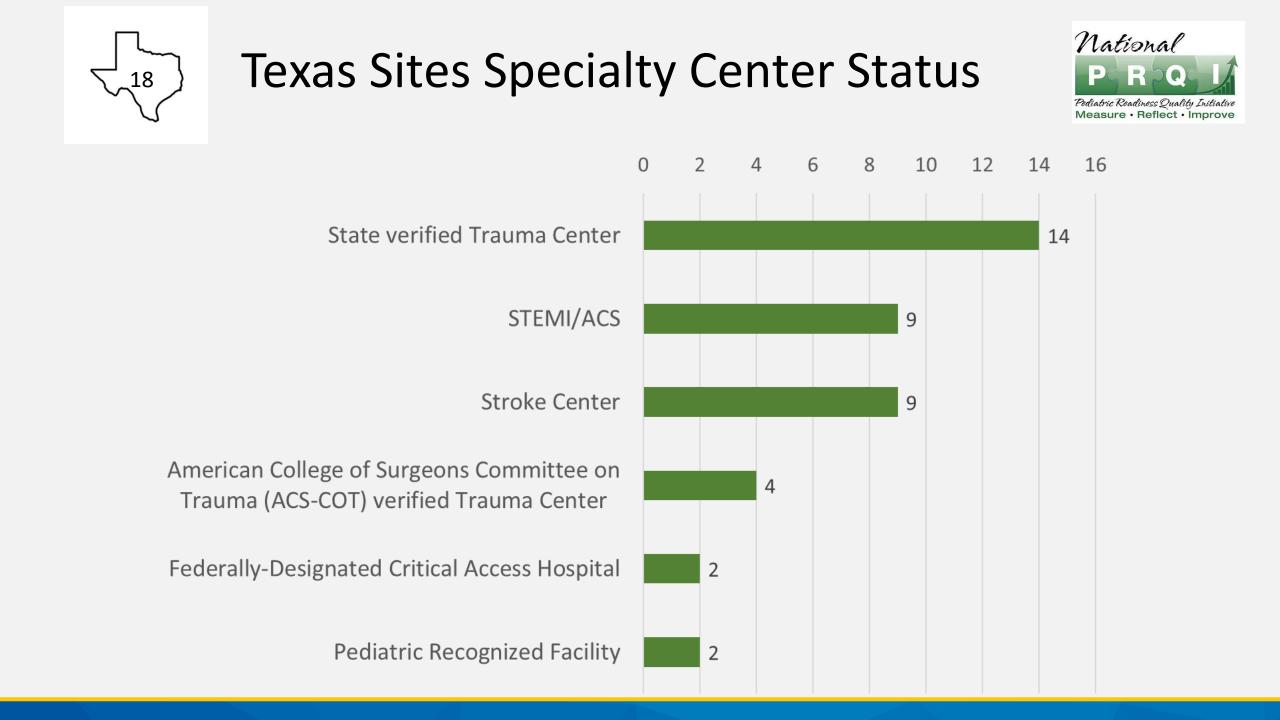

Texas Sites Annual Pediatric Volume

- Low: < 1,800 pediatric patients
- High: >= 10,000 pediatric patients
- Medium: 1,800 4,999 pediatric patients

Summary

- This project is impacting hospitals in every RAC
- Hospitals are identifying Pediatric Emergency Care Coordinators and participating in NPRQI
- Hospitals are completing their National Pediatric Readiness Project assessment and identifying their gaps in readiness
- ED staff are participating in pediatric trauma simulation
- Regional Pediatric Emergency Care Coordinators are making a difference in hospital engagement in pediatric readiness
- RAC Leaders have been invaluable to supporting this project!

EMS Pediatric Stroke Triage GuidanceRecommendations

Pediatric Stroke is a rare disease that is, nevertheless, included among the top ten causes of **death** in pediatrics.¹¹ However, rapid recognition and appropriate treatment of pediatric stroke can profoundly improve outcomes for these children, sparing them from decades of disability.^{2,32,3} This guidance document is designed to help EMS providers recognize and triage pediatric stroke patients quickly to facilitate improved outcomes throughout the state.

Goal:

To enhance EMS identification of strokes in the pediatric population (infants and children less than 18 years of age), as well as to increase rapid triage and transport to the nearest appropriate facility.

Purpose:

In consultation with EMS, ER, stroke, pediatric neurology, and pediatric leaders from around the state and current American Heart Association recommendations, we have developed the below EMS guidelines for pediatric patients with a known or suspected stroke.^{4,54,5}

General Information on Pediatric Stroke

Pediatric stroke can present with focal neurologic signs, as well as non-specific signs like seizure or altered mental status.⁶⁻¹⁰⁶⁻¹⁰

Sudden onset of any of the following suggests the possibility of acute stroke:

- Numbness or weakness of face, arm and/or leg (especially on one side of the body)
- Confusion
- Trouble speaking or understanding language
- Trouble seeing in one or both eyes or double vision
- Altered Mental Status
- Trouble walking
- Dizziness
- Loss of balance or coordination
- Severe headache with no known cause (suggests hemorrhagic stroke), especially with altered mental status
- For patients with any of the above neurological signs, especially with the listed conditions below, consider triaging as an acute stroke.

Patients with any of the following are at higher risk for acute stroke:

- Heart disease
- History of blood vessel problems in the brain
- History of stroke
- Sickle cell disease
- Cancer
- History of blood clots

Common pediatric stroke mimics:

- Alcoholic intoxication
- Cerebral infections
- Drug overdose
- Hypoglycemia
- Hyperglycemia
- Genetic/metabolic disorders
- Atypical migraines
- Neuropathies (e.g. Bell's palsy)
- Seizure
- Post-ictal state
- Tumors

Prehospital Triage of Stroke Patients

Basic Level – in suspected stroke cases, as with all other pediatric patients, assess and treat ABCDEs per universal pediatric recommendations:

- A (Airway): Airway support and ventilation assistance are recommended for patients with acute stroke who have decreased consciousness or who have compromised airway. Ensure airway patency with suctioning and OPA or NPA, as needed.
- **B** (Breathing): Supplemental oxygen should be provided to maintain oxygen saturation > 94% (continuous monitoring).
- NOTE: some patients with congenital heart disease have a different goal saturation level (80-90% in some cases). Confirm normal level with parents/caretakers if unsure.
- C (Circulation): Evaluate and treat signs/symptoms of shock according to the Shock
 Clinical Practice Guidelines
- D (Disability): Assess and document GCS, pupillary size and reactivity.
- E (Exposure/Environmental): Assess for evidence of traumatic injury, especially head injury.

Stabilization and initial management:

- If there is evidence of shock, treat according to the Shock clinical practice guidelines.
- If there is hypoglycemia (POC glucose < 60 mg/dL), treat according to diabetic emergencies clinical practice guidelines.
- If there are seizures, treat according to the seizure clinical practice guidelines.
- Place the patient in a supine position, head of the bed elevated 30 degrees.
- Cardiac monitoring during transport is recommended.

Cardiovascular examination:

- Record blood pressure, rate, rhythm, respiratory rate and oxygen saturation.
- Obtain an EKG if it will not delay transport.

Neurological assessment for pediatric stroke:

- Weakness of face, arm and/or leg (especially on one side of the body)
- Numbness on one side of the face or body
- Confusion
- Trouble speaking or understanding language
- Trouble seeing in one or both eyes or double vision
- Altered Mental Status
- Trouble walking
- Dizziness
- Loss of balance or coordination
- Severe headache with no known cause (suggests hemorrhagic stroke), especially with altered mental status
- Seizure with post-ictal focal deficit (like weakness) that does not resolve quickly (~15 minutes)
- * NOTE There are no validated pre-hospital screening tools for pediatric stroke.

History:

Interview patient, family members and other witnesses to determine symptoms, time of symptom discovery and last known well (LKW), or last time patient was without symptoms. Ask about seizure at onset, head trauma, history of recent surgeries, history of bleeding problems, and signs of possible brain hemorrhage (severe headache of sudden onset, nausea/vomiting with headache or loss of consciousness). Obtain mobile number of next of kin and witnesses.

NOTE: For "wake up strokes" the last known well time is the last time that they were witnessed to be at their baseline, which may be the night before. The time they are found is not the last known well time.

Additional History:

- Obtain past medical history and history of past and recent surgeries.
- Allergies (e.g., iodinated contrast)
- Pre-existing substantial disability (e.g., unable to walk independently)
- Device and implant history (e.g., left ventricular assist device, pacemaker, valve replacement, VP shunt)

Medications:

 Obtain a list of all medications including antiplatelet agents (e.g. aspirin, clopidogrel [Plavix]) and blood thinners (direct thrombin inhibitors, factor Xa inhibitors, low molecular weight heparin [enoxaparin/ Lovenox], unfractionated heparin, warfarin [Coumadin], rivaroxaban [Xarelto], dabigatran [Pradaxa], apixaban [Eliquis], edoxaban [Savaysa]). • If possible, record when the last dose was taken.

Management:

EMS personnel should address ABCDEs per universal pediatric guidelines. Additional initial management steps include:

- Prevent aspiration, HOB > 30. Ensure airway patency with suctioning and OPA or NPA as needed.
- 2. Provide supplemental oxygen if needed to keep oxygen saturation > 94%.
 - Adjust if the patient has known congenital heart disease with a different goal oxygen saturation)
- 3. Avoid hypotension. Maintain systolic blood pressure >50%ile for age.

Systolic Blood Pressure Parameters¹¹

| Female | | Male | | | |
|-------------|---------|-------------------------|-------------|---------|-------------------------|
| Age | 50%ile | 20% above the 95%ile | Age | 50%ile | 20% above the 95%ile |
| 1-4 years | 90mmHg | 133mmHg | 1-4 years | 90mmHg | 134mmHg |
| 5-10 years | 96mmHg | 145mmHg | 5-10 years | 96mmHg | 145mmHg |
| 11-17 years | 105mmHg | 157mmHg | 11-17 years | 110mmHg | 168mmHg |

- Call online medical control for severe hypertension (persistent systolic BP that is ≥20% above the 95th percentile).
- Hypoglycemia (blood glucose < 60 mg/dL) should be treated in patients suspected of acute ischemic stroke.
- To facilitate expedited stroke workup in the ED, place two peripheral IVs so long as it does not delay transport time.

System Triage:

Goal on-scene time is 10-15 minutes or less. Encourage the family to go directly to the ED if not transported with the patient.

Destination Decision-Making for Pediatric Suspected Stroke in Rural, Urban and Suburban Areas

Each Regional Advisory Council (RAC) should outline the patient age appropriate for adult stroke facility admission based on regional facility resources or hospital policies.

 Pediatric patient suspected of stroke and last known well ≤ 24 hours; triage based on following criteria:

Age appropriateness for adult stroke facility:

- Pediatric suspected stroke, age < appropriate:

 Transport suspected stroke patients to the nearest Recognized Stroke Facility with Pediatric Capabilities.
 - Recognized Stroke Facility with Pediatric Capabilities a pediatric hospital with recognized capability to care for pediatric patients with stroke.
 - If no Recognized Stroke Facility with Pediatric Capabilities is within 60minute by air or ground total transport time or the patient is unstable, transport to the nearest Pediatric Facility.
- Pediatric suspected stroke, age > appropriate:
 - Perform Validated Stroke Severity Screening Tool to access for potential large vessel occlusion (LVO), such as RACE score.¹²
 - If LVO Screening Tool Positive:
 - Transport suspected stroke patients to the nearest adult Comprehensive Stroke Center (CSC/ Level 1) if within ≤ 30 minutes from the nearest Recognized Stroke Facility with Pediatric Capabilities and no more than 60-minute total transport time by air or ground.
 - If no CSC is available within 30 minutes, transport to nearest thrombectomy capable stroke center (TSC/ Level 2) if within < 30 minutes from the nearest Recognized Stroke Facility with Pediatric Capabilities and no more than 60-minute total transport time by air or ground.
 - If neither a CSC nor TSC is available within ≤ 30 minutes, transport to the nearest Recognized Stroke Facility with Pediatric Capabilities.
 - If no Recognized Stroke Facility with Pediatric Capabilities is available within ≤ 60 minutes or the patient is unstable, transport to the nearest Pediatric Facility.
 - If LVO Screening Tool Negative:
 - Transport suspected stroke patients to the nearest Recognized Stroke Facility with Pediatric Capabilities.
 - If no Recognized Stroke Facility with Pediatric Capabilities is within 60-minute by air or ground total transport time or the patient is unstable, transport to the nearest Pediatric Facility.
- Pediatric patient suspected of stroke and last known well > 24 <u>hours</u>, triage based on following criteria:
 - Pediatric suspected stroke, for all ages:
 - Transport suspected stroke patients to the nearest Recognized Stroke Facility with Pediatric Capabilities.
 - If no Recognized Stroke Facility with Pediatric Capabilities is within a 60minute total transport time or the patient is unstable, transport to the nearest Pediatric Facility.
- ◆ For all ages, consider air medical if prolonged transport time > 60 minutes.

- Stroke Prenotification, alert receiving facility that a suspected pediatric stroke patient is in route prior to arrival. A stroke alert prior to arrival will mobilize appropriate resources before patient arrival.
 - Prenotification should include: Age, last known well, current vital signs, stroke screening tool score (if performed) and symptoms (weakness on one side, altered mental status, <u>etc</u>).
- Hand-off Goal: 120 seconds for EMS to ED triage nurse hand-off.

(Note – Plan is adapted from 2022 Pediatric Stroke North Central Texas Regional Stroke Plan)

Vote

SSOC Meeting Monday August 19th 2024

Objective: The GETAC stroke committee seeks to recommend a different set of stroke standards to the department. The recommendation is to use the AHA/ASA Guidelines.

- 1. SSOC will serve as the working group to review and discuss the standards to be recommended.
- 2. Develop a gap analysis of the BAC standards to the current AHA recommendations
 - a. Why AHA standards would be best for Texas to follow.
 - b. Evidence that the current stroke survey organizations utilize the standards for their certification evaluation.
 - c. Are there any conflict of interests or down sides to remaining with the BAC

standards

Gap Analysis

AHA/ASA standards for their certification evaluation. When considering the various societies that have purview in the field of stroke and cerebrovascular disease, the AHA provides the most comprehensive, current guidelines across the continuum of care for stroke patients. When the BAC publishes a new statement, we could re-evaluate returning to the BAC as our source for standards.

These are a sample of AHA Publications as References

Ideal Foundational Requirements for Stroke Program Development and Growth: A Scientific Statement <u>From</u> the American Heart Association. Stroke Volume 54, Number 4 https://doi.org/10.1161/STR.00000000000424

Recommendations for the Establishment of Stroke Systems of Care: A 2019

The published Brain Attack Coalition (BAC) guidelines for stroke care are out of date; the BAC have not published updated guidelines. From their website, the BAC have published <u>1)</u>"Formation and Function of Acute Stroke-Ready Hospitals in 2013; (2)"Revised and Updated Recommendations for the Establishment of Primary Stroke Centers (2011); (3)"Recommendations for Comprehensive Stroke Centers" in 2005.

a new level of care for stroke center certification has also been introduced by several accrediting bodies pertaining to thrombectomy capability. However, the BAC has not published updated standards to incorporate these transformative changes in stroke care. Staying with the outdated BAC publication places Texas more than 10 years behind in standards of care.

What is an alternative neutral party that we could reference as a source? The proposal is to refer to the American Stroke Association under the American Heart Association as the main source for stroke care guidelines. The AHA has updated its guidelines through multiple publications on the most recent evidence from clinical trials to support best practices in stroke care. Current stroke survey organizations utilize the

Chair: Stephen Flaherty, MD, FACS Vice-Chair: Lori Adams, MHA, BSN-RN, TCRN, NHDP-BC

Texas Department of State Health Services

Matagorda Regional Medical Center

On the morning of March 22, around shift change time, the ER staff were notified that there had been a serious car wreck close to the hospital.

As the EMS Chief was giving the hospital the information about the injured, a second wreck happened in the same place due to rubbernecking.

MRMC received 5 critical patients from EMS – including one of their own nurses who had just finished her shift.

Injuries included multiple patients with fractured pelvis and femurs. Being a small facility, they did not have enough supplies and splints, so they had to make do with sheets etc.

All 5 critical patients were transferred to a level I in Houston and all survived!!

Trauma Program Manager is Krisann Shoemaker ED Director is Christy Hoke TMD is Dr Young

August 2024 Report to GETAC Council

Top 11 Measures: Approve Revised Language

- 1. For injured adult patients <65yrs with a GCS <9 or SBP<90mmHg, time from arrival to departure from sending facility
- 2. # of severe maternal morbidity events (21 ICD-10 codes) per 1000 live births
- 3. For patients with acute ischemic stroke, door-to-needle time
- 4. Percent of EMS patients with primary impression of "stroke" who have a stroke screening scale documented by EMS
- 5. Percent of OHCA patients that received bystander CPR prior to EMS arrival
- 6. Percent of OHCA patients in public locations where AED was applied prior to EMS arrival
- 7. Mean or Median pediatric readiness score for designated trauma centers
- 8. Percent of trauma centers that took the pediatric readiness assessment in a given calendar year
- 9. Percent of patients greater than or equal to 12 years of age who are screened for suicide
- 10. Percent of admitted injured patients greater than or equal to 12 years of age who are screened for substance use/misuse
- 11. Percent of newborns (<28 days) transported by EMS who arrive at the hospital with a temperature <36.5 Celsius

Eight Measures for Ranking

- 1. For injured adult patients <65yrs with a GCS <9 or SBP<90mmHg, time from arrival to departure from sending facility (>65yrs with SBP<110mmHg, <15yrs SBP <70 + 2(age))
- 2. # of severe maternal morbidity events (21 ICD-10 codes) per 1000 live births
- 3. For patients with acute ischemic stroke, door-to-needle time
- 4. Percent of EMS patients with primary impression of "stroke" who have a stroke screening scale documented by EMS
- 5. Percent of OHCA patients that received bystander CPR prior to EMS arrival
- 6. Percent of OHCA patients in public locations where AED was applied prior to EMS arrival
- 7. Mean or Median pediatric readiness score for designated trauma centers
- 8. Percent of trauma centers that took the pediatric readiness assessment in a given calendar year

Texas EMS and Trauma System Quality Measure Final Rankings (n=15)

| Measure | Total Score | Ranking |
|--|-------------|---------|
| For injured adult patients < 65yrs with a GCS < 9 or SBP< 90mmHg, time from arrival to departure from sending facility | 39 | 1 |
| For patients with acute ischemic stroke, door-to-needle time | 52 | 2 |
| # of severe maternal morbidity events (21 ICD-10 codes) per 1000 live births | | |
| | 55 | 3 |
| Percent of EMS patients with primary impression of 'stroke' who have a stroke screening scale documented by EMS | 69 | 4 |
| Mean and Median pediatric readiness score for designated trauma centers | 75 | 5 |
| Percent of OHCA patients that received bystander CPR prior to EMS arrival | 81 | |
| Percent of trauma centers that took the pediatric readiness assessment in a given calendar year | | |
| | 84 | |
| Percent of OHCA patients in public locations where AED was applied prior to EMS arrival | 85 | |

Top 5 Measures

- 1. Time from arrival to departure for unstable injured patients (transfers)
- 2. Door-to-needle time for patients with acute ischemic stroke
- 3. Rate of severe maternal morbidity events
- 4. Percent of EMS "stroke" patients with a stroke screening scale
- 5. Pediatric readiness score for designated trauma centers

Next Steps

GETAC Council: Vote on top 5 measures for approval

Future discussion topics: Reporting structure, stratification, frequency of reports, data transparency, and specific aims for selected measures

Implementation goal: January 2025

8.b. Burn Care Task Force

Dr. Alan Tyroch, GETAC Chair

8.c. Pre-hospital Whole Blood Task Force

Eric Epley, NREMT-P, CEM Task Force Chair

Pre-Hosp WB Task Force Summary

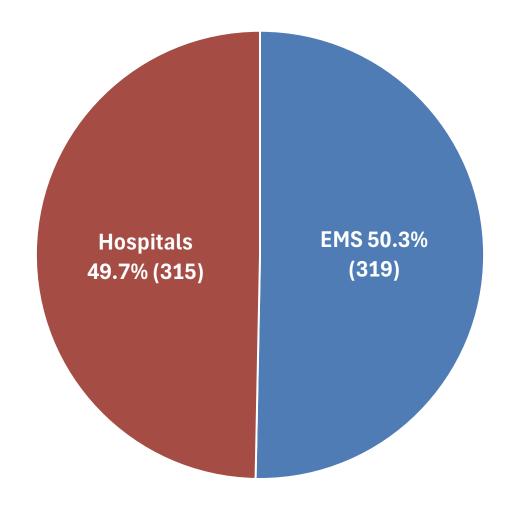

- CMS rules comments thru PHBTIC due Sept 5th
- Whole Blood EMS and Hospital Survey Results
- Deep dive on Blood Center Operations and Methodologies; understanding everyone's perspective
- Utilizing NCTTRAC equipment EMS unit kit list pricing and Survey results for Legislative Ask
- Bradford Ray, UMC EP to present Component Vs. Whole Blood Business case
- Visit the South and North Chapters of ACS COT mtgs

Governor's EMS and Trauma Advisory Council

Pre-Hospital Whole Blood Task Force: Blood Utilization Survey

August 2024

Pre-Hospital Whole Blood Task Force: Blood Utilization Survey

Overwhelming response to the survey on short order (<10 days):

20 of 22 RAC(s) participated

634 Respondents

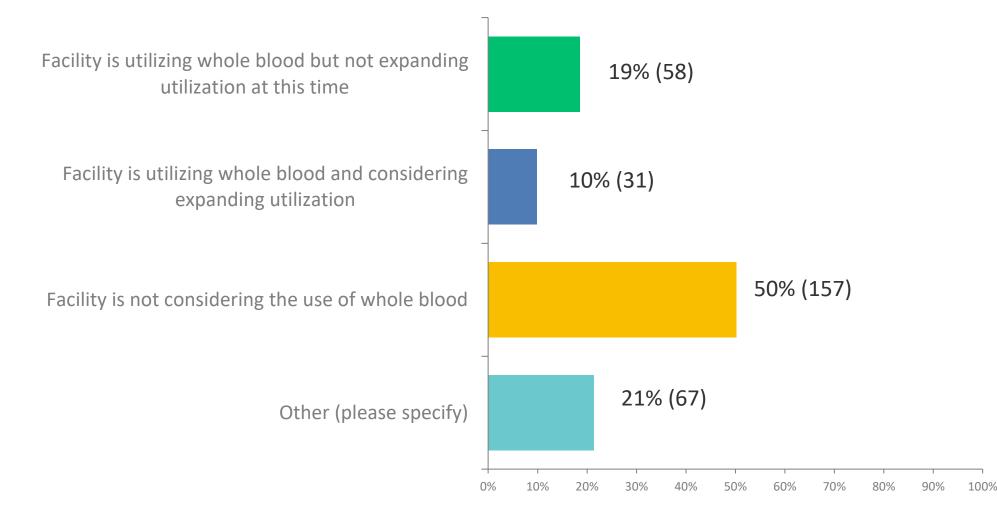

- 319 Prehospital Providers
- 315 Hospitals

GETAC PHWBTF: Blood Utilization Survey, August 20, 2024

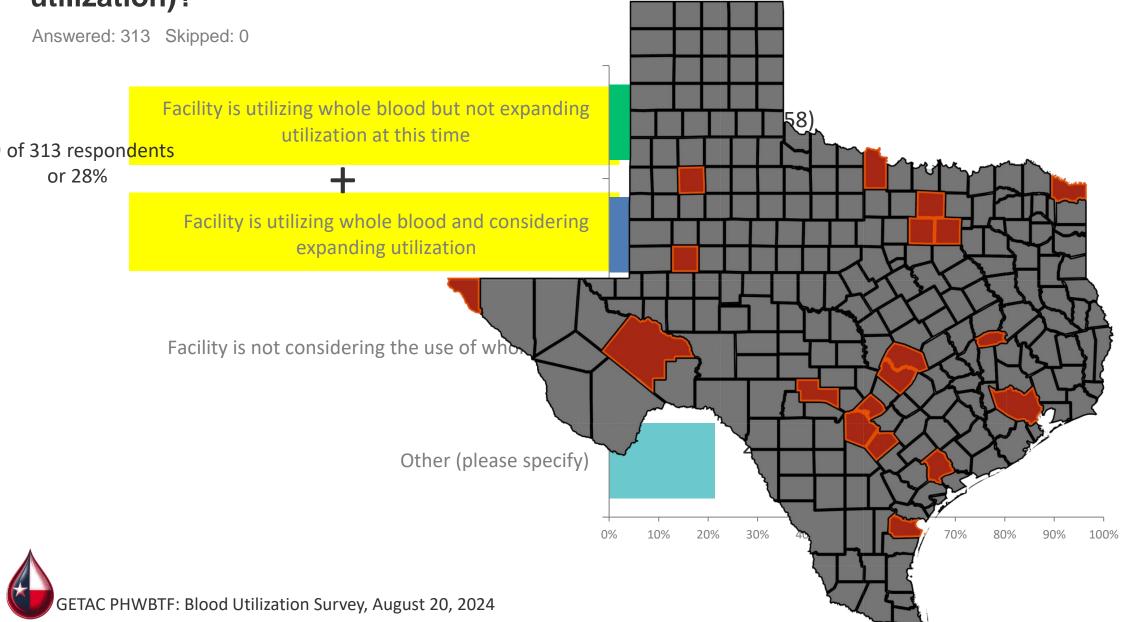

Thank you!

Q1: Is your facility considering the use of whole blood (or expanding WB utilization)?

Answered: 313 Skipped: 0

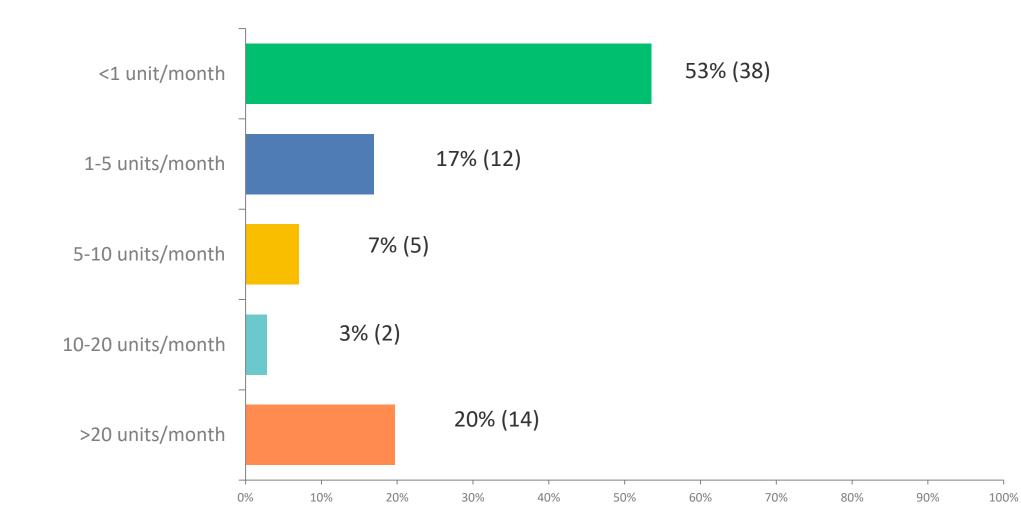

Q1: Is your facility considering the use of whole blood (or expanding WB utilization)?

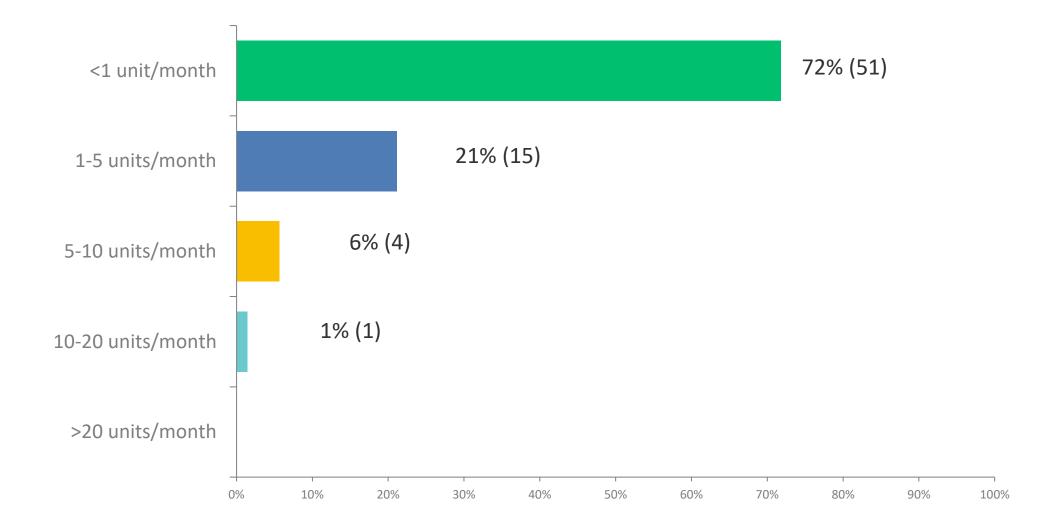

Q2: How much whole blood is used monthly (number of units)?

Answered: 71 Skipped: 242

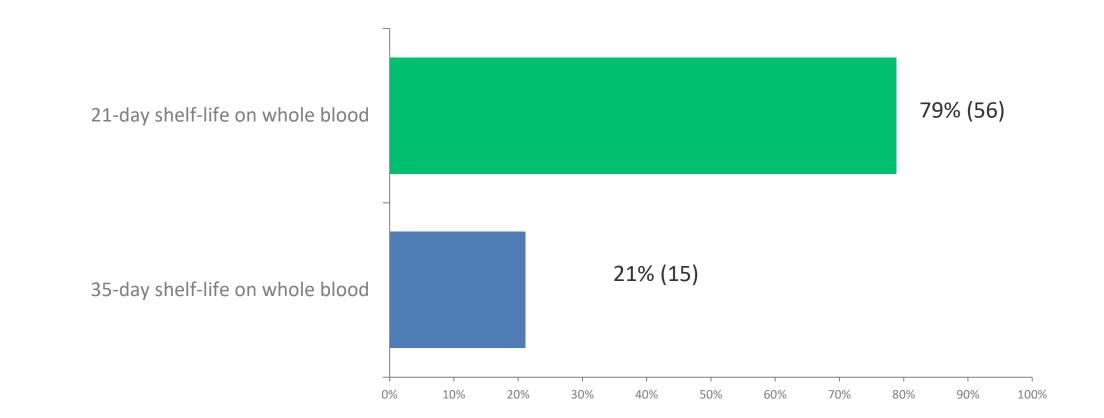

Q3: In your facility, how many units of whole blood expire per month?

Answered: 71 Skipped: 242

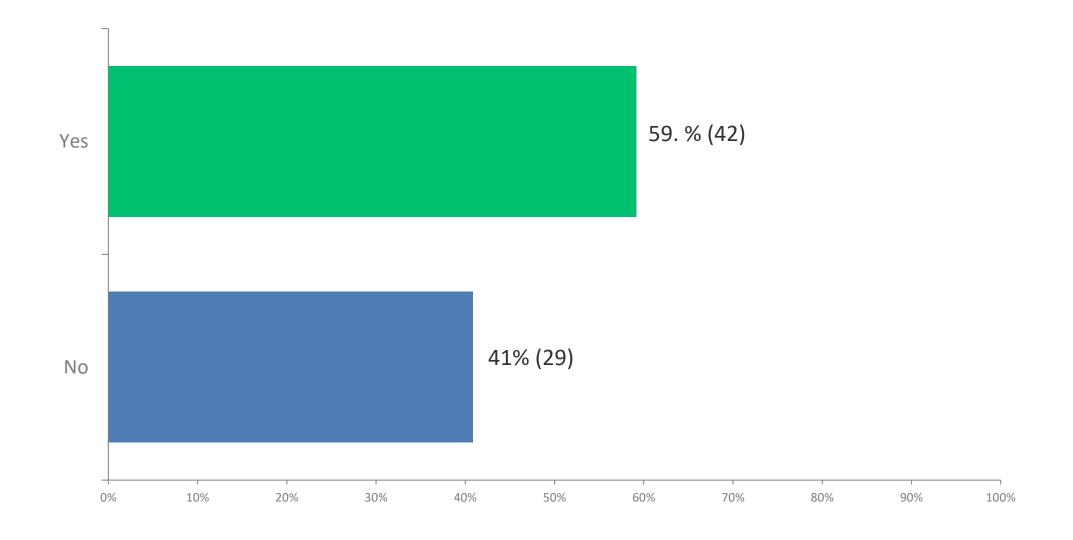

Q4: Is your whole blood shelf-life 21 or 35 days?

Answered: 71 Skipped: 242

Q5: Is your facility willing to be a Rotation Center for prehospital utilization of whole blood?

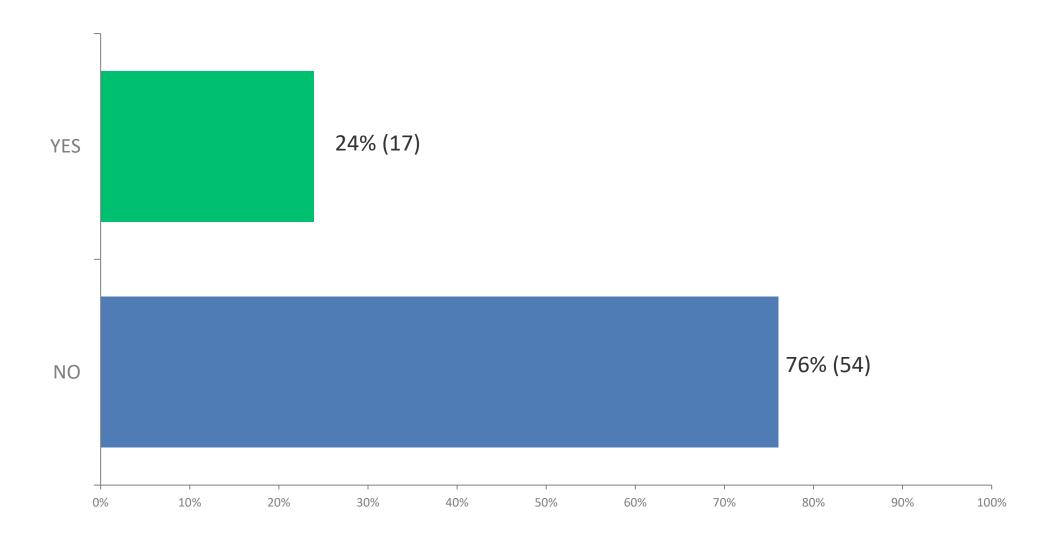

Answered: 71 Skipped: 242

HOSPITAL SURVEY

Q6: Does your facility have an internal blood collection process?

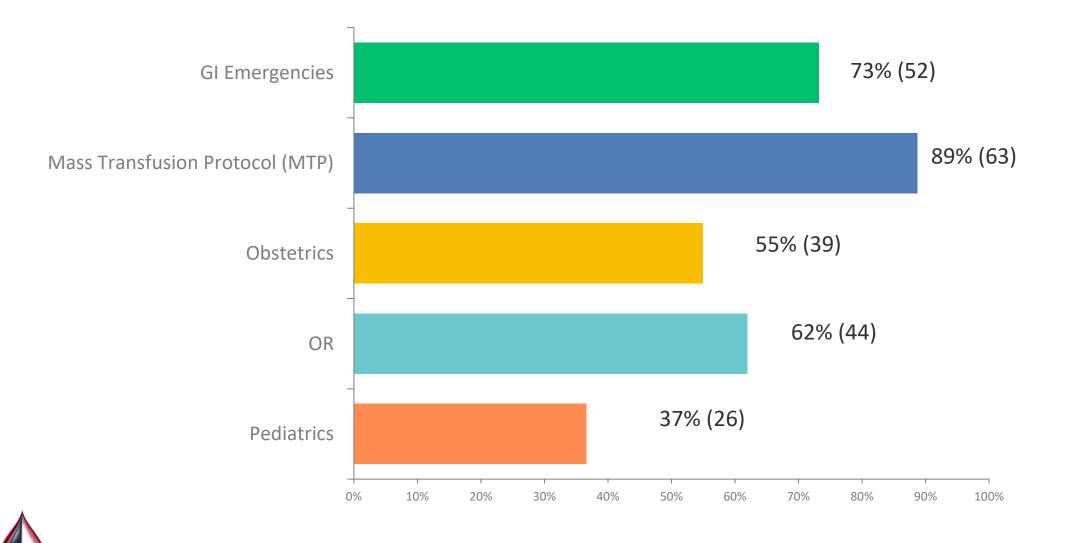

Answered: 71 Skipped: 242

HOSPITAL SURVEY

Q7: Are you considering utilizing whole blood for the following populations (check all that apply)?

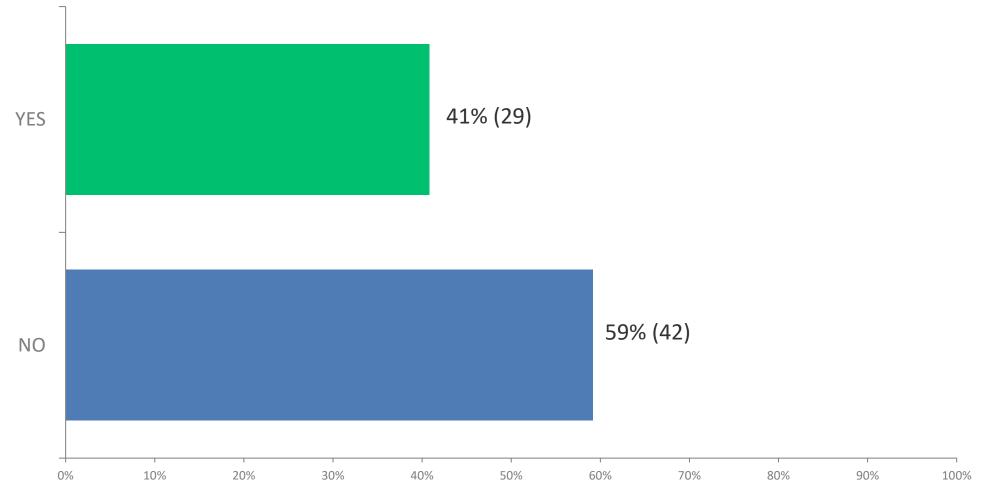

Answered: 71 Skipped: 242

HOSPITAL SURVEY

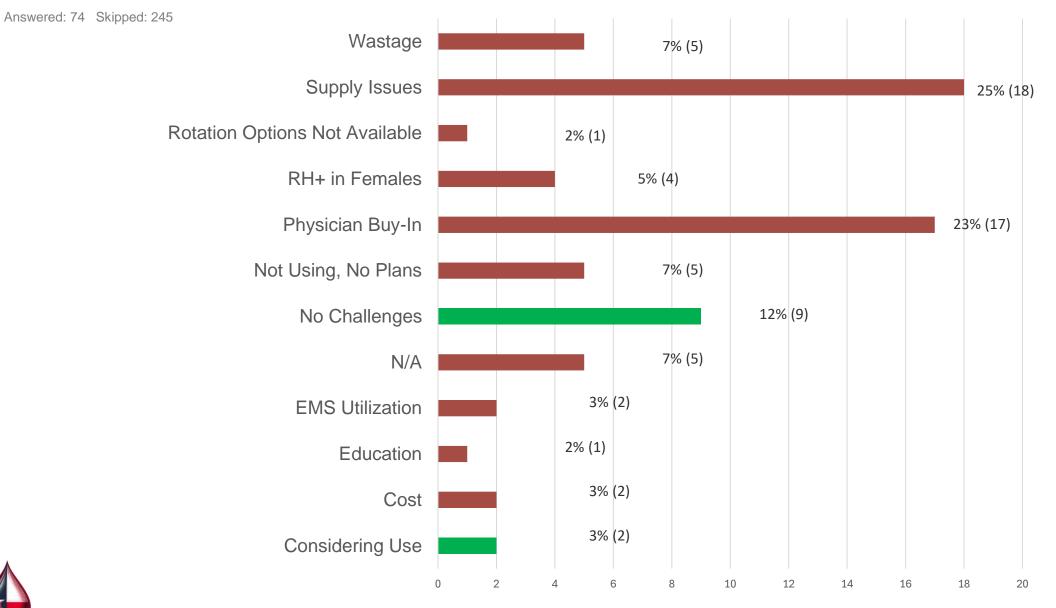

Q8: Is whole blood a part of your facility's Massive Transfusion Protocol?

Answered: 71 Skipped: 242

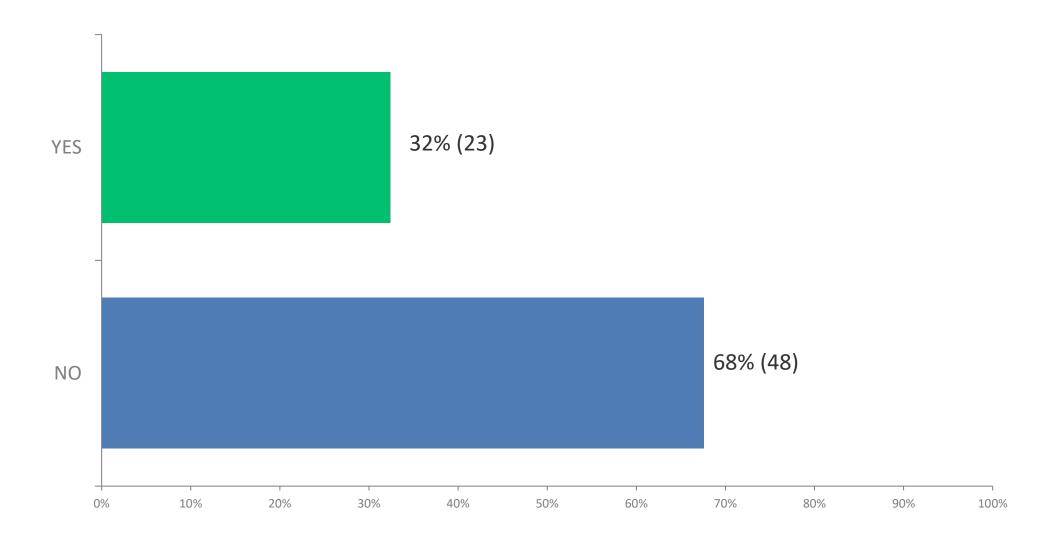

-7

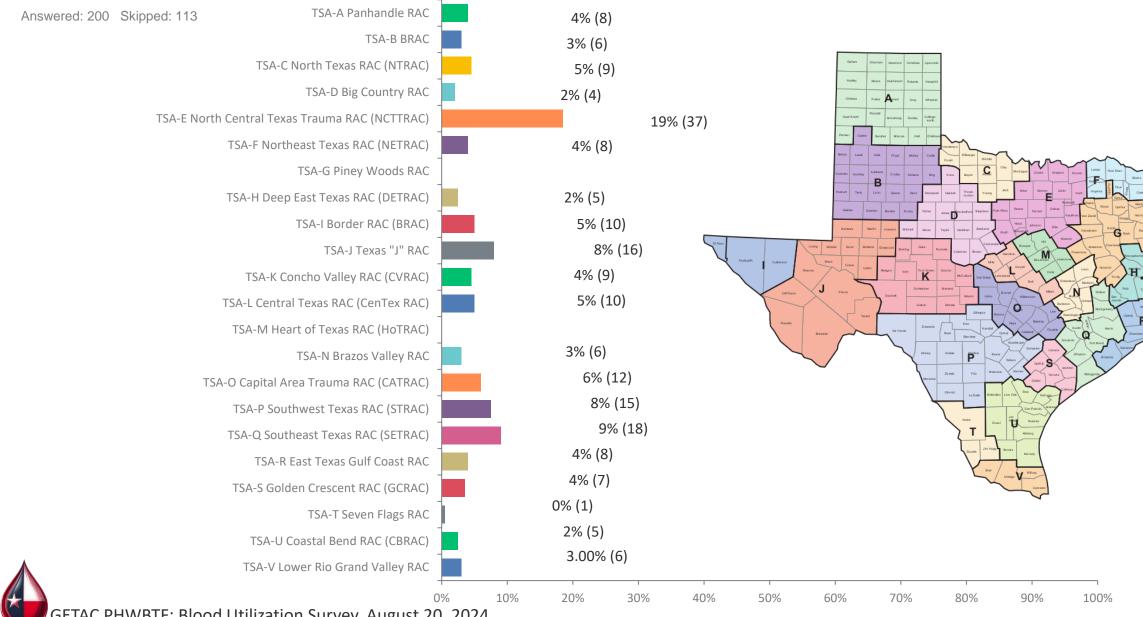

Q9: What are the challenges for using whole blood outside of trauma? (comment field, these are general categories of the comments)

Q10: Does your facility use or manufacture non-leuko reduced whole blood?

Answered: 71 Skipped: 242

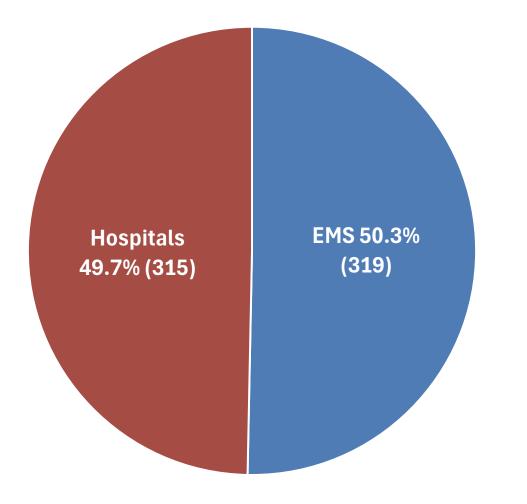

Q12: What RAC (Trauma Service Area) are you in?

GETAC PHWBTF: Blood Utilization Survey, August 20, 2024

HOSPITAL SURVEY

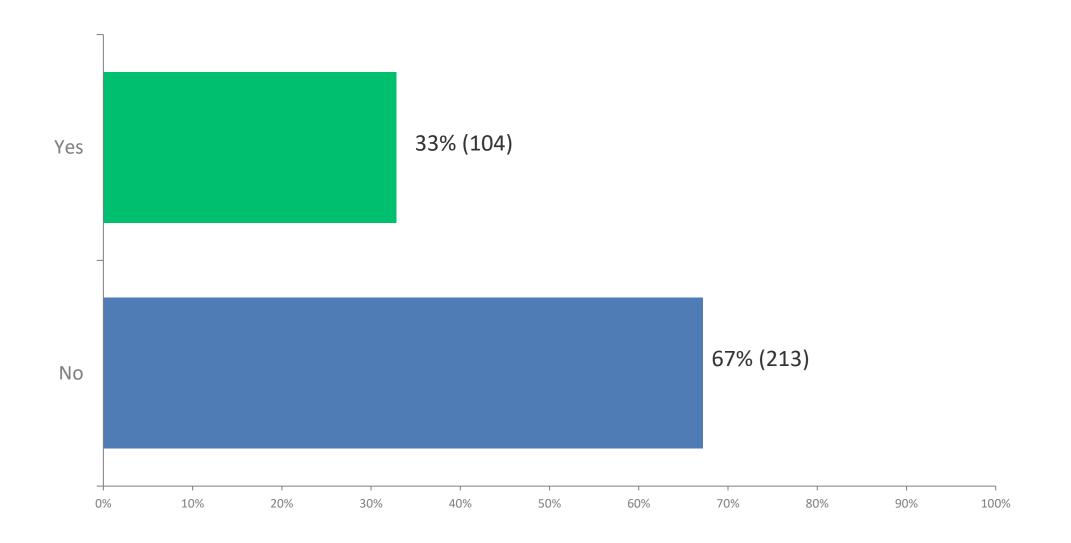

Pre-Hospital Whole Blood Task Force: Blood Utilization Survey

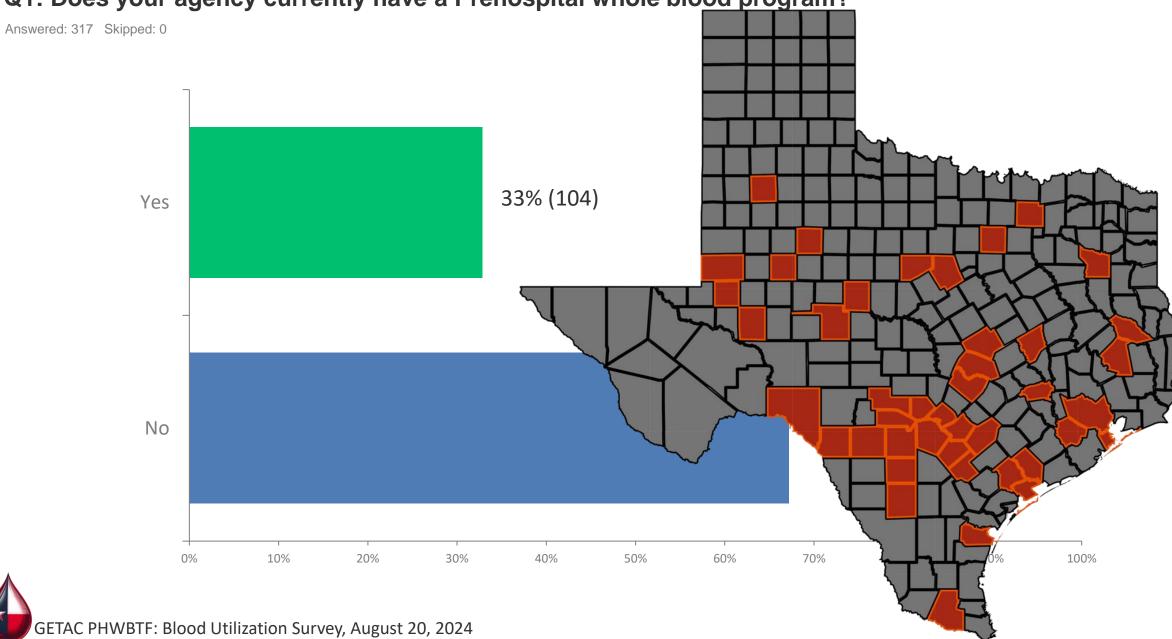

Switching gears to Prehospital (EMS) Data

Q1: Does your agency currently have a Prehospital whole blood program?

Answered: 317 Skipped: 0

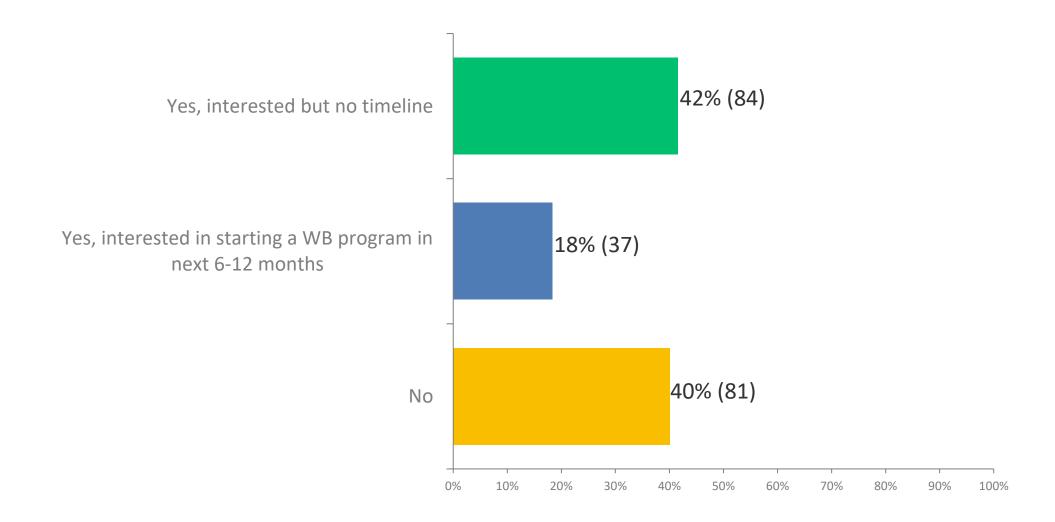

Q1: Does your agency currently have a Prehospital whole blood program?

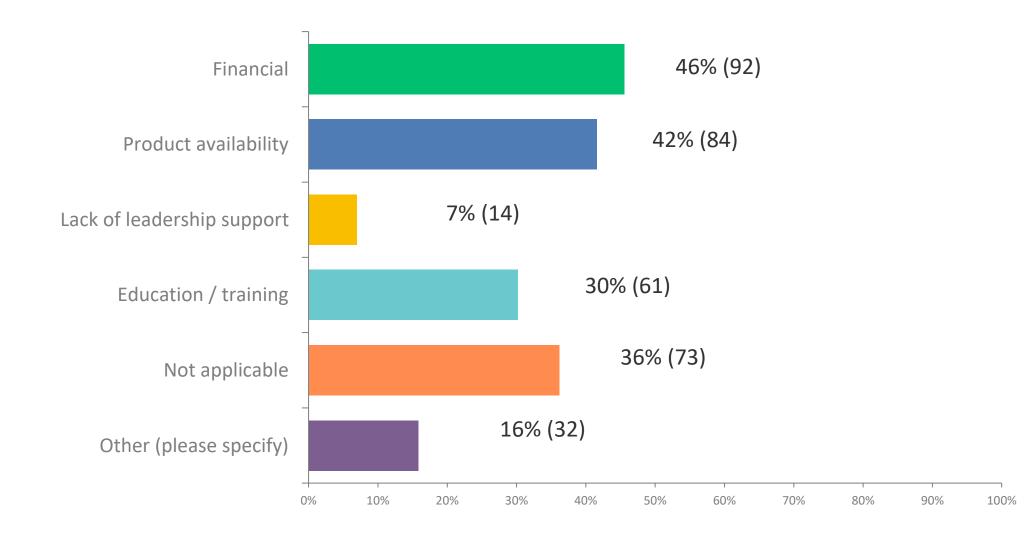

Q2: If you answered "no" in question-1, are you interested or do you have plans to start a whole blood program next 6-12 mos?

Answered: 202 Skipped: 115

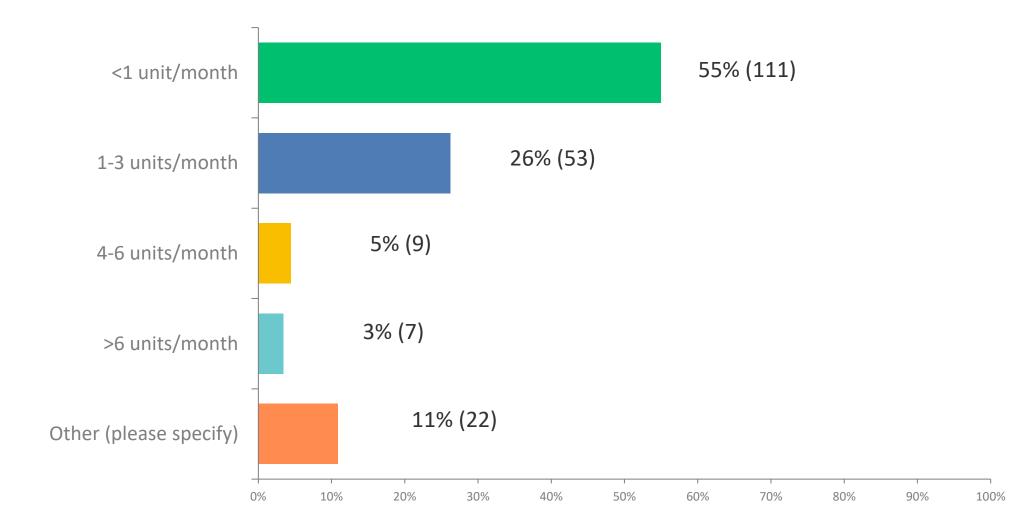

Q3: If you answered "yes" to question 2, please indicate any challenges you may have to start a whole blood program (check all that apply).

Answered: 202 Skipped: 115

Q4: If not utilizing whole blood, how much whole blood do you think you would utilize (if you had a blood program)?

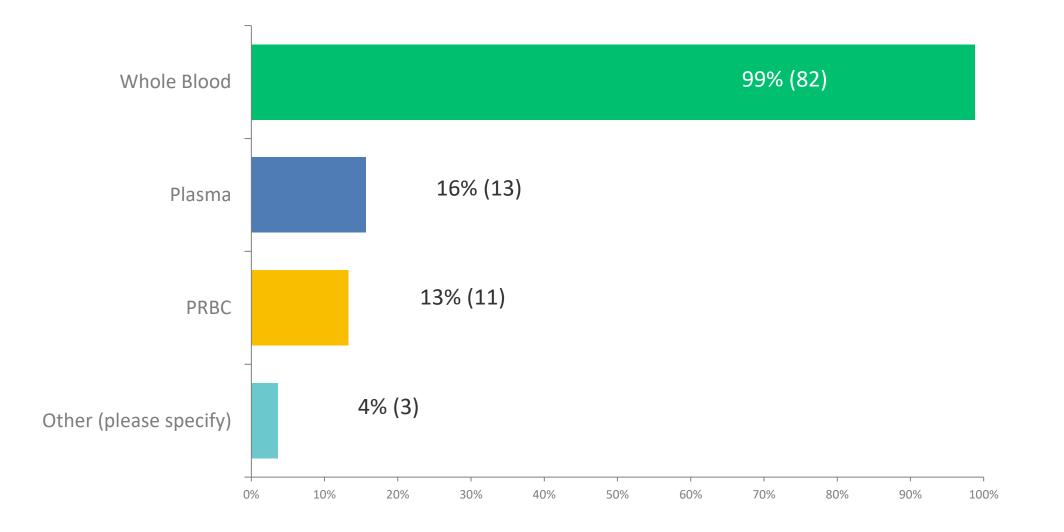

Answered: 202 Skipped: 115

PREHOSPITAL (EMS) SURVEY

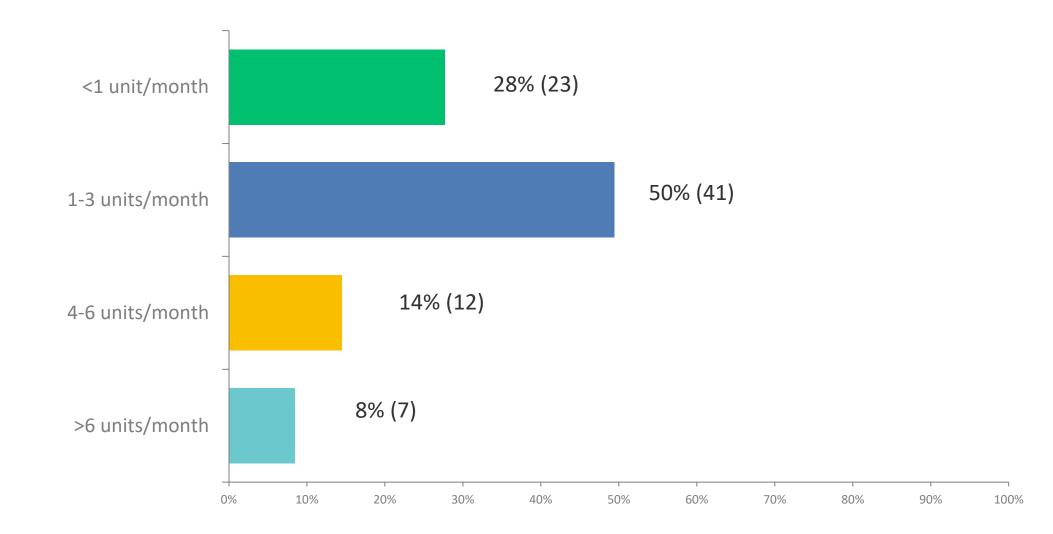

Q5: Please indicate what products you currently carry (check all that apply)

Answered: 83 Skipped: 234

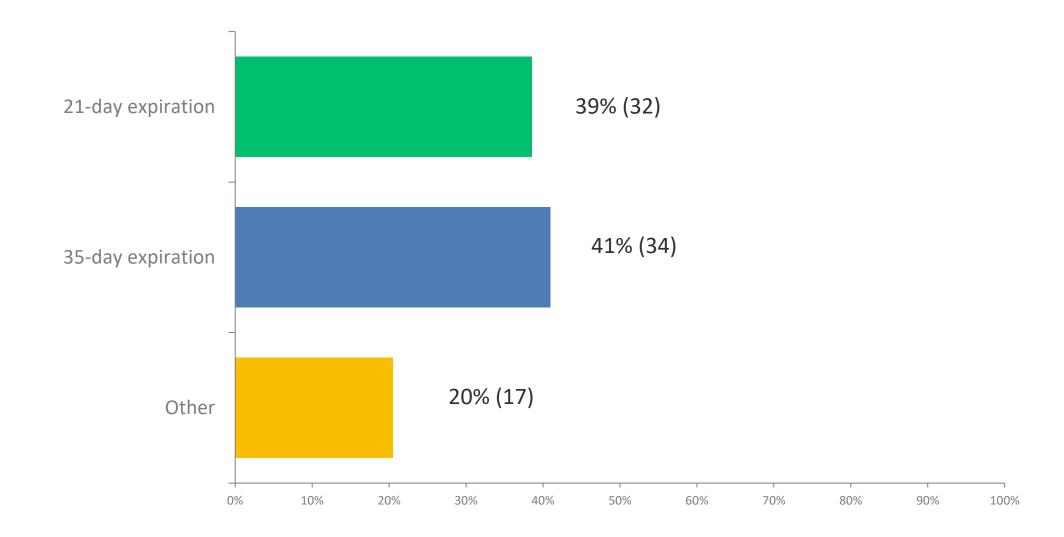

Q6: How much blood product(s) is used weekly (number of units)?

Answered: 83 Skipped: 234

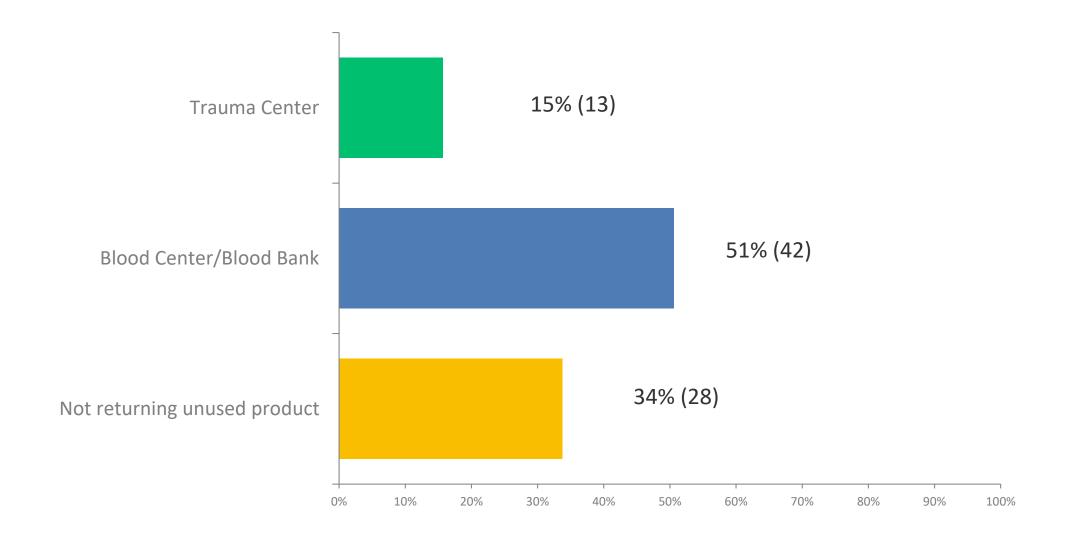

Q7: Is the blood product you are using in your agency have a 21-day or 35-day expiration?

Answered: 83 Skipped: 234

Q8: Are you returning your blood products to a trauma center or back to the blood center?

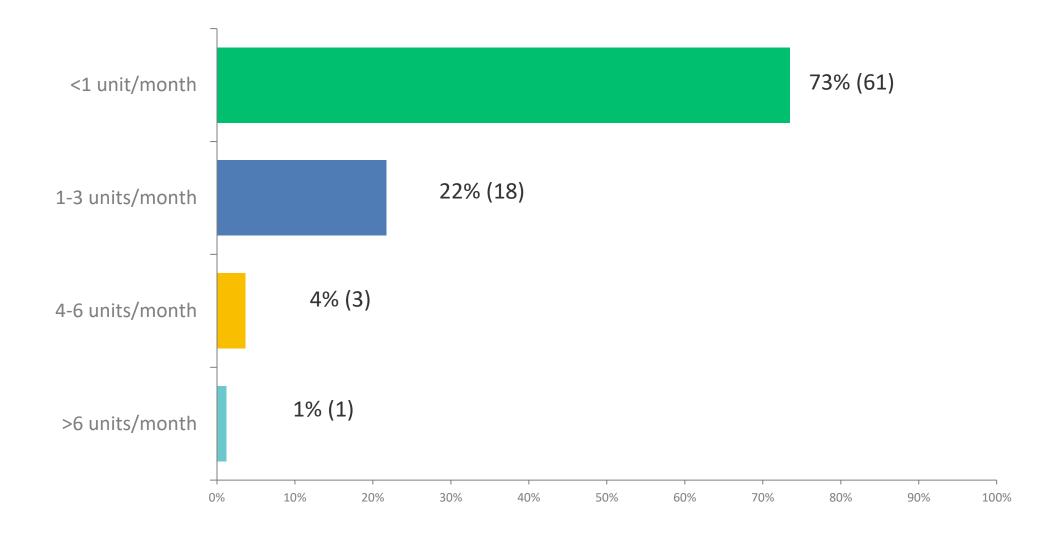

Answered: 83 Skipped: 234

PREHOSPITAL (EMS) SURVEY

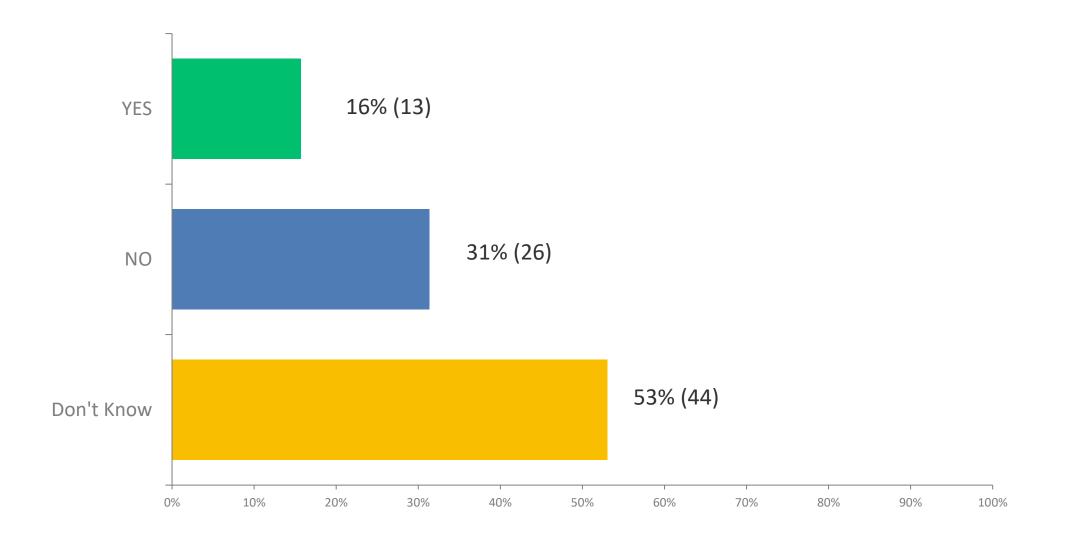

Q9: How many units/month of blood product(s) expire?

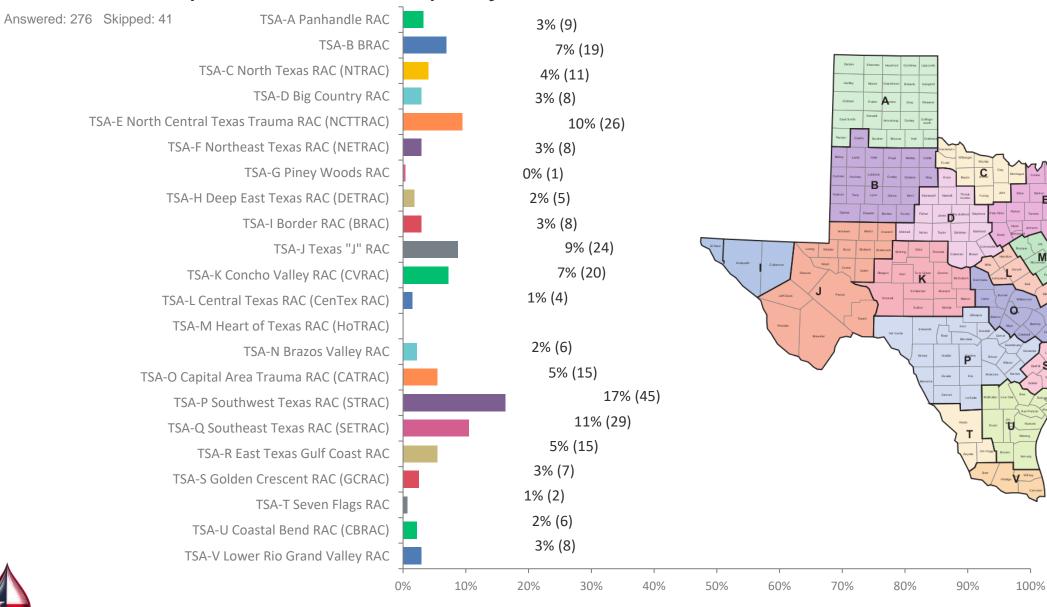

Answered: 83 Skipped: 234

Q10: Is the product you are using leuko-reduced?

Answered: 83 Skipped: 234

Q12: What RAC (Trauma Service Area) are you in?

Governor's EMS and Trauma Advisory Council Pre-Hospital Whole Blood Task Force: Blood Utilization Survey Questions?

August 2024

9. Proposed Rule Amendments

9.a. Trauma Rules, Title 25 Chapter 157 concerning Emergency Medical Care 157.2, 157.123, 157.125, 157.125, 157.128, 157.130

> Jorie Klein, MSN, MHA, BSN, RN EMS/Trauma Systems Director

9.b. EMS Rules, Title 25 Chapter 157, concerning Dialysis Transport, 157.11 Draft Dialysis Rules

> Joseph Schmider State EMS Director

Amendment to §157.11, Requirements for an Emergency Medical Services Provider License

- To comply with Senate Bill (S.B.) 2133, 88th Legislature, Regular Session, amended Texas Health and Safety Code (HSC) §773.050
- Transport dialysis patient in declared disaster.

- Plan for how the provider will respond to disaster incidents, including mass casualty situations in coordination with local and regional plans.
- (i) An EMS provider must have a plan for providing transport for a dialysis patient who places an emergency 9-1-1 telephone call during a declared disaster. An alternative mode of transport may be used to move the patient directly to and from an outpatient end stage renal disease facility if the patient's normal and alternative modes of transportation cannot be used during the disaster. The plan will include a communication plan with the receiving facility prior to the patient being transported to a receiving facility.
- (ii) An EMS provider's plan under this subsection may prioritize providing transportation for a patient suffering from an acute emergency condition over transportation for a dialysis patient.

- (I) A "disaster" has the meaning assigned by Texas Government Code §418.004 and §418.014.
- (II) "End stage renal disease facility" has the meaning assigned by Texas Health and Safety Code §251.001(7).
- (iii) Liability of a unit of local government under this chapter is limited to money damages in a maximum amount of \$100,000 for each person and \$300,000 for each single occurrence for bodily injury or death and \$100,000 for each single occurrence for injury to or destruction of property, as described in Texas Civil Practice and Remedies Code \$101.023(d).

3 amendments

- (J) 25 triage tags, or participation in the RAC triage plan.
- Clean up throughout the rule to address the "Plain Language" policy

Plan forward

- Reviewed by GETAC August 2024
- Official public comment dates: 11-1-2024 until 12-2-2024
- Rule effective date 3-6-2025
- Rule can be re-open to address any other change after these rules are adopted

Any questions or comments

10. Executive Council Activities

• Pediatric Scenarios: Newborn Resuscitation, Penetrating Trauma, Intentional Overdose, and Hanging Scenario 11. Texas EMS, Trauma & Acute Care Foundation (TETAF) March 2024

Dinah Welsh, TETAF President/CEO

Texas EMS, Trauma & Acute Care Foundation Update

Dinah Welsh

TETAF President/CEO

Friday, August 23, 2024

Advocacy

- TETAF held a virtual stakeholder meeting with more than 120 attending on August 6 to discuss the proposed trauma rules. Additionally, Dinah Welsh, Wanda Helgesen (TETAF Board Chair and BorderRAC Executive Director), and Dr. Craig Rhyne (Retired Trauma Surgeon, TETAF Surveyor, Former TETAF Board Chair) provided oral comments regarding the rules during the August 15 meeting of the Texas Health and Human Services Executive Council. TETAF will provide formal written comments on the newly proposed trauma rules.
- The TETAF Advocacy Committee is meeting regularly to prepare for the 89th Texas Legislative Session and focused on the TETAF Legislative Priorities.

241

Surveys – Trauma, Stroke, Maternal, and Neonatal

- The number of surveys continues at a steady pace for all survey service lines in the last quarter. Trauma and maternal continue to be the two busiest service lines, followed by neonatal and stroke.
- TETAF is anticipating a slightly slower fiscal year with the perinatal survey cycles.

EDUCATION : INFORMATION : SURVEYS A Program of the Texas EMS Trauma & Acute Care Foundation

Education

- The next virtual TETAF Hospital Data Management Course (HDMC) will be October 29-30. This course meets the current state rule requirements for Level III and Level IV trauma registrars and is designed to improve the skill sets of the data entry specialist. Contact hours can be earned upon completion of the course. Go to <u>www.tetaf.org/hdmc</u> to sign up and be notified of the next course.
- TETAF and Texas Perinatal Services continue to offer exclusive, free educational opportunities to our hospital partners via Mighty Networks.

Scan with the camera on your phone to join Mighty Networks or visit <u>www.tetaf-tps.mn.co</u>

Texas Perinatal Services

EDUCATION : INFORMATION : SURVEYS A Program of the Texas EMS Trauma & Acute Care Foundation

Collaboration

- □ TETAF continues to provide support to Texas TQIP.
 - Texas TQIP membership is growing. Membership is currently open to Level I and Level II participating TQIP trauma centers in Texas. The collaborative hopes to expand its membership to Level III hospitals next year. Anyone from a Level III trauma center can attend the meetings, but they are not voting members, yet, of the collaborative.
- TETAF continues to provide all continuing education for the Texas Trauma Coordinators Forum and participate in their educational activities.
- TETAF welcomes the opportunity to be a resource, support, and/or participate in any meetings to further build the trauma and emergency care network.

- TETAF hosted the 35th Anniversary Celebration of the Texas Trauma System
 - Thank you to 42 sponsors and more than 200 people who attended
 - Proceeds will benefit the TETAF Rural Trauma System Development Fund

Texas Perinatal Services

12. Discussion, review, and recommendations for initiatives that instill a culture of safety for responders and the public with a focus on operations and safe driving practices

13. Discussion of Rural Priorities

14. Discussion and possible action on initiatives, programs, and potential research that might improve the Trauma and Emergency Healthcare System in Texas.

15. Final Public Comment

Three minutes is the allocated allotment of time for public comment.

Please state the following when making comments:

- Your name
- Organization you represent
- Agenda item you would like to address.

16. Announcements

17. Next Council Meeting Dates

Quarterly Meetings:

• Q4 – November 23-25, 2024, in conjunction with the Texas EMS Conference in Ft. Worth.

18. Adjournment

Alan Tyroch, MD, GETAC Chair

Thank you for all you do to support the GETAC mission to promote, develop, and advance an accountable, patient-centered Trauma and Emergency Healthcare System!
