

TEXAS DEPARTMENT OF HEALTH  
FISH AND SHELLFISH CONSUMPTION ADVISORY

ADV - 1

The Texas Department of Health hereby advises all persons consuming fish and shellfish from the waters of the State of Texas that the fish and shellfish described below taken from the described area should be consumed in quantities no greater than those indicated.

This advisory is issued as a result of dioxin contamination of the described species. Dioxin is a probable human carcinogen, and may also cause other human health effects, particularly liver abnormalities and reproductive effects. Health concerns from dioxin are related to long term, regular consumption of fish and shellfish contaminated with the persistent chemical.

AREA: The Brazos River and all contiguous waters south and east of the FM 521 bridge near Brazoria to the mouth of the river.

SPECIES AFFECTED: All species of fish.

CONSUMPTION ADVISORY:

A. No more than one meal, not to exceed eight ounces, each month.

B. Women of child-bearing age and children should not consume any fish from this area.

This advisory shall remain in effect until rescinded or modified in writing.

Issued this 19th day of September, 1990.

  
Robert Bernstein, M.D., F.A.C.P.  
Commissioner of Health
